### Criteria :1 Curricular Aspects

### Key Indicator: 1.3 Curriculum Enrichment

**Metric: 1.3.3 Percentage of programmes that have components of field projects / research projects / internships during the last five years.**

Incorporating components such as field projects, research projects, and internships into programme syllabi is critical for several reasons. Firstly, these components offer students practical, hands-on experience that complements theoretical knowledge gained in the classroom. Field projects allow students to apply concepts learned in real-world settings, bridging the gap between theory and practice. Research projects foster critical thinking, problem-solving, and analytical skills as students navigate the complexities of gathering and analysing data. Internships provide valuable exposure to professional environments, allowing students to gain insight into industry practices, develop professional networks, and explore potential career paths.
