Academic Year: 2019-20

S.No	Parameter	Rating			
		Strongly Agree (4)	Agree (3)	Partially Agree (2)	Dis agree (1)
1.	The course outcomes are well defined and clear	✓			
2.	Course contents are relevant to the Local/ Regional / National / Global needs	✓			
3.	Course has focus on Employability/ Entrepreneurship/ Skill Development	✓			
4.	Course Pattern motivates the students to use the resources such as library and e-gadgets for their learning	✓			
5.	The Course evaluation schemes fulfill the learning system as student-centric	✓			
6.	Feedback from academic audit on course, helps to fine-tune the curriculum	✓			
7.	The books prescribed / listed as reference materials are relevant, updated and appropriate	✓			

8. Challenging topics (if any) & Give Reasons: Group Theory
This topic is more concept oriented, has vast extensions leading to numerous results and conclusions. Working under this topic will be more intresting and productive.

9. Course contents to be added (Give Reasons) Another Counting Principle	10. Course contents to be removed (Give Reasons) Nil

11. Any other suggestions to improve the course:

Academic Year: 2019-20

S.No	Parameter	Rating			
		Strongly Agree (4)	Agree (3)	Partially Agree (2)	Dis agree (1)
1.	The course outcomes are well defined and clear	✓			
2.	Course contents are relevant to the Local/ Regional / National / Global needs	✓			
3.	Course has focus on Employability/ Entrepreneurship/ Skill Development	✓			
4.	Course Pattern motivates the students to use the resources such as library and e-gadgets for their learning	✓			
5.	The Course evaluation schemes fulfill the learning system as student-centric	✓			
6.	Feedback from academic audit on course, helps to fine-tune the curriculum	✓			
7.	The books prescribed / listed as reference materials are relevant, updated and appropriate	✓			

8. Challenging topics (if any) & Give Reasons : Vector Spaces
All topics under Vector Spaces are concept oriented and working on it gives a rich experience to the learner by improving logical thinking and reasoning. Further it enhances the problem solving ability of the learner.

9. Course contents to be added (Give Reasons)	10. Course contents to be removed (Give Reasons)
Nil	Nil

STAKEHOLDERS REPORT ON CURRICULUM

Feedback Process

Curriculum Development Cell (CDC) plays a vital role in establishing Stakeholders inputs. In this context, NGM offers the required setups for feedback responses from Students, instructors, and other stakeholders on Institutional procedures connected to Curriculum. The main goal of stakeholder feedback is to gain insightful information that can be used to improve all facets of Teaching, Learning, Assessment, and Capacity. The Evaluation of the Curriculum is ongoing and necessary because it is one of the key components of the Teaching and Learning process. The following information describes the curriculum development process.

Every academic year, in the months of April and November, the evaluations of the curriculum and syllabi are documented. Data on syllabus development and overall Programme experience are incorporated into the curriculum investigation. The review of the current curriculum in-light of student, industry, and job placement demands becomes the first step in developing curricula for various Programmes.

The process of curriculum development and revision involves a thorough and extensive evaluation of the current curriculum, which must go through several stages with the active participation of students, teachers, and academic experts from other institutions.

Students submit feedback on the curriculum for each course, and this feedback is collected and properly taken into account when assessing the curriculum. At the end of every academic year, feedback from students is collected through a questionnaire template created by the ERP. At the end of the semester, online feedback is gathered from the Students through the ERP. The Curriculum Development Cell reviews the feedback of each faculty member for all of the courses they have taught during the session.

The appropriate established curriculum review committee of the institution, which typically meets at the end of every semester, evaluates the feedback collected from all stakeholders. The Curriculum Development Cell holds in-depth discussions on the recommendations based on the feedback. Changes are suggested at the Board of Studies meeting once the feedback has been thoroughly analyzed.

1. **Student's Feedback**

Following a thorough examination and analysis, the institution is using the student comments as a foundation to make changes to the current system. The feedback form on Curriculum constitutes for students asks for both quantitative and qualitative responses, with questions on Curriculum aspects. Students can provide feedback and suggestions on the plan, teaching-learning, and extracurricular activities by completing a survey that is made available to them twice a year at the end of each term. This feedback is then analyzed and shared with the

relevant department. The academic council is presented with appropriate proposals to put into practice. The BoS recommends significant revisions to the course content after receiving the input in order to make these adjustments.

The majority of survey respondents expressed satisfaction with the Programme structure. Positive input from the pupils has been shown in the scheme's ongoing improvements. Most students are interested in the course material and how theory and practical lessons are taught. As per the curricular designs, the syllabus, lesson plans, and lab instructions were accessible via the web interface. They are pleased with the courses that were assigned to them for teaching, the activities held throughout the 2021-22 academic year in the form of guest lectures and workshops, etc.

The majority of students expressed their satisfaction that the reference material available in the library is sufficient to meet the theoretical as well as practical aspects of the course, whereas only a small number of them expressed their struggles regarding the resource's availability in terms of reading material and equipment/software used in laboratories. Students now have access to an extension from the institute that allows them to view e-books and other electronic resources with their login information.

Additionally, the majority of students are pleased with the software and tools that the Institute provides for them to obtain an understanding of the theoretical topics that are taught to them through lectures, tutorials, and meetings with outside experts. In order to improve their comprehension and concept clarity and to connect theoretical elements to practice, students have implemented the same basics in the lab and through practical's. To provide experimentation and testing facilities for the research students on campus, the Institute additionally purchased a research facility in which the most cutting-edge lab equipment has been installed.

The majority of students have expressed satisfaction with their time spent in class as a result of the faculty choosing a variety of teaching methods, such as PPTs, site visits, animations, live examples, prototypes, etc., and incorporating interactive elements, problem-solving techniques that are relevant to real-world situations as well as providing appropriate challenges to support and enhance their learning process. In order to give students insights into their Programme and related subjects, the school is employing well-qualified faculty members with exemplary teaching, research, or industry expertise.

Criteria: 6.5.1

Personal mentors have been allocated to assist those suffering students with poor CGPAs, psychiatric issues, or social shortcomings. The majority of the students who have participated have positively indicated their satisfaction with the resolution of any academic or personal query. Mentors work to promote the overall welfare of students.

On a monthly basis, mentors meet with their assigned mentees to discuss difficulties and offer suggestions for solutions to help the students deal with their current predicament. Parents are also kept informed of the situation in order to encourage and assist their ward in any way possible.

2. **Faculty Feedback**

Course coordination meetings are held by the Department level twice a semester as a matter of practice. These discussions are centered on improving the quality of the theory/practical courses' content, pedagogy, learning materials, and student performance as
well as other aspects of the curriculum through research and extension efforts. The teaching-learning process, research, and extension activities are considered once the faculty members have had an opportunity to voice their opinions and suggestions during these meetings and also through CAMU ERP.

3. **Alumni Feedback**

Alumni were appreciative of the flexibility offered by the curriculum to build abilities in interdisciplinary fields. In order to help students understand the material better, the methodology has been tailored to meet their specific needs. The development of skills is a major focus of the flexible curriculum.

Students will do better in exams at the national and international levels because to the curriculum's good alignment with the syllabus of competitive exams like TANSCET, CAT,NET, CUET etc. Students who are taking preparatory Programmes can better understand the exam's prerequisites. The students become more confident and motivated as a result of many review cycles, mock exams, and professional lectures. It helps students land better jobs when there is a sufficient input of professional development activities and courses available. The standard of instruction and student awareness of the market is both constantly improving. More industry-

specific curricular components could also aid in closing the gap between business and higher education. From the very beginning of academic career, opportunities for delivery should be made available. Mini-project requirements should be built into the curriculum for students as early as possible, whenever it is feasible, along with the theoretical courses that they correspond with.

The necessity of the hour is constant upgrading with regard to new developments in fashion, technology, and industry standards. The curriculum should be revised on a regular basis to reflect new courses, languages, Programmes, subjects, and tools that the Industry demands. There will be more opportunities in the future if students are more actively involved in developing creative initiatives, organizing and carrying out research, etc. Alumni eulogized the amount of information available in the library, the high caliber of the facilities, and the other assistance offered to students.

The Programme is well-designed to develop a discipline-specific core competency. Numerous options for sports, cultural, and extracurricular activities are offered via campus life and events. For the students' holistic development and to produce responsible members of society, the curriculum should also include a variety of activities focusing on developing essential life skills, such as sensitivity training, emergency preparedness, disaster management, crisis management, community learning, etc.

4. **Employers Feedback**

Employers indicate their level of satisfaction with the availability of course options in the schemes, according to the feedback that has been received. The recommended curricula are useful for obtaining employment and improving the abilities necessary for it. The curriculum narrows the divide between Industry and Institute.

The implementation of the ideas in the Programme plans and other curricular activities has been discussed with the relevant authorities regarding all of them.

1.4.2 Action taken Report – Based on Feedback on Curriculum

S.no	Stakeholder	Feedback/Suggestion given by stakeholders	Action taken
1	Faculty	Advanced topics can be included in the course. Suggested to increase more number of reference books.	On the basis of suggestion given by stakeholders the following changes are made. Advanced topics are included; the new paper is named as R-Programming. More reference books are available in library. Students can access magazines to improve their skills.
2	Employer	Students have to improve communication and technical skills.	Instructions were given and made them to participate in academic related programs that helped them improve their communication and technical skill. Build-IT platform is devised for coding and students are encouraged to participate in the national level hackathon. Training programs are scheduled by Career Development Centre (CDC) for the students to improve their communication skills.
3	Student	Curriculum should add advanced courses related to intra and inter disciplinary.	Based on the input received by the students, courses like R programming are included in the curriculum, and also students have a flexibility to choose different Professional and open elective courses offered by the other branches.
4	Alumni	To improve academic facilities and activities as per the industry standards.	Hands on training by the internal faculty and training are provided to students on java full stack and R programming, Advanced Python Programming etc as per the needs of the industry.

STUDENT FEEDBACK ON CURRICULUM EVEN 2021-2022

1. **Strength of the syllabus is met with PO**
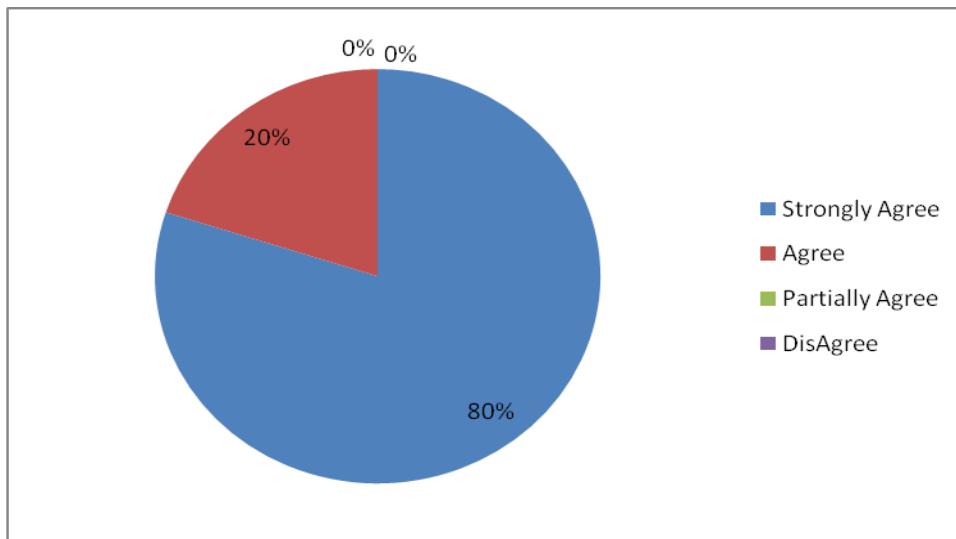

2. **The course curriculum and activities (seminar, assignment, industrial visit, project, internship, field visit) to bridge the gap between academic and industrial needs**

118

3. Allocations of the hours and credits to the courses are satisfactory

Pie chart showing:
- Strongly Agree: 57%
- Agree: 36%
- Partially Agree: 7%
- DisAgree: 0%

4. K1, K2, K3, K4, K5, K6 (Blooms taxonomy) followed in assessment / end semester pattern is matched with the same level of Course Outcomes framed

Pie chart showing:
- Strongly Agree: 80%
- Agree: 16%
- Partially Agree: 4%
- DisAgree: 0%

5. Course supports to Higher studies / Employability / Research

Strongly Agree 77%, Agree 13%, Partially Agree 10%, DisAgree 0%

6. Course helps in preparing for competitive exams

Strongly Agree 73%, Agree 27%, Partially Agree 0%, DisAgree 0%
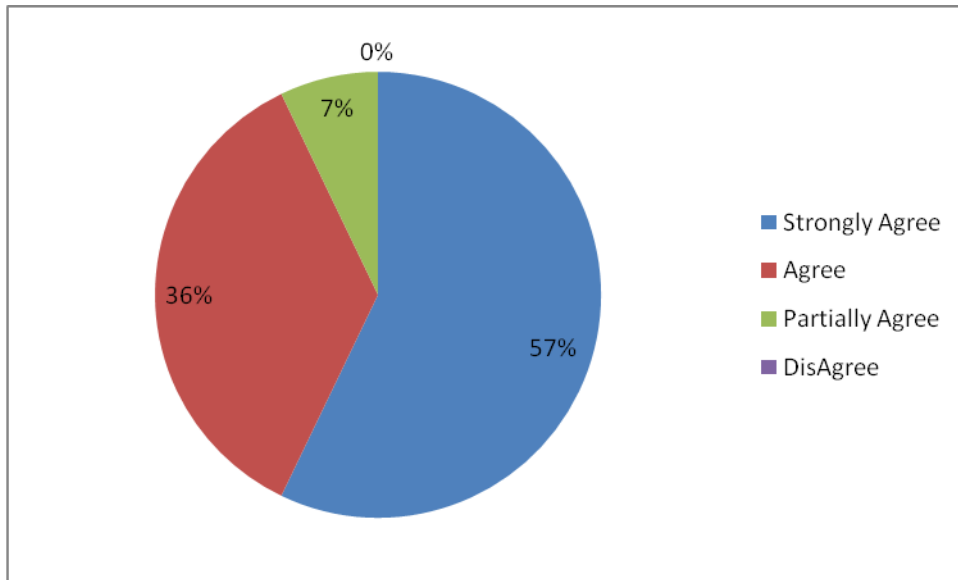

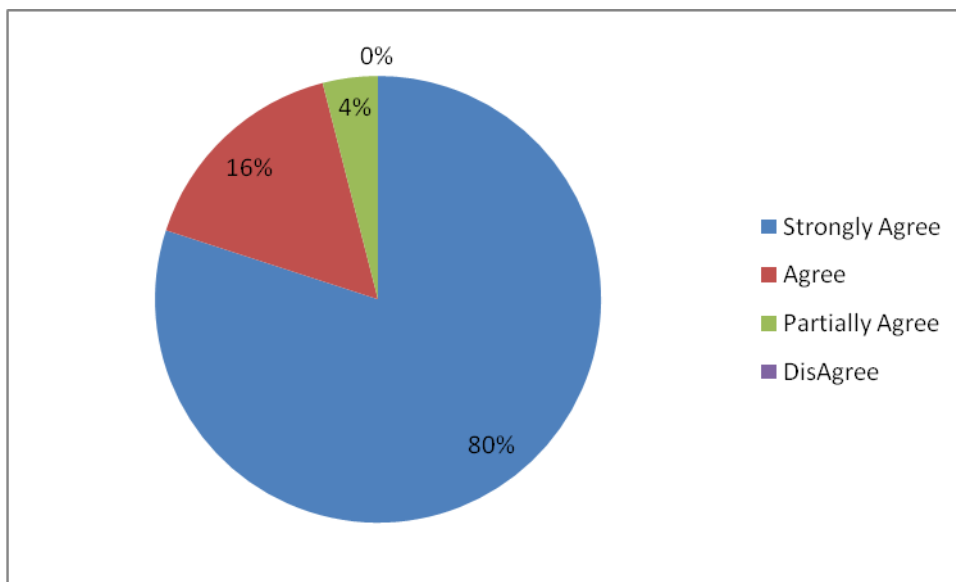

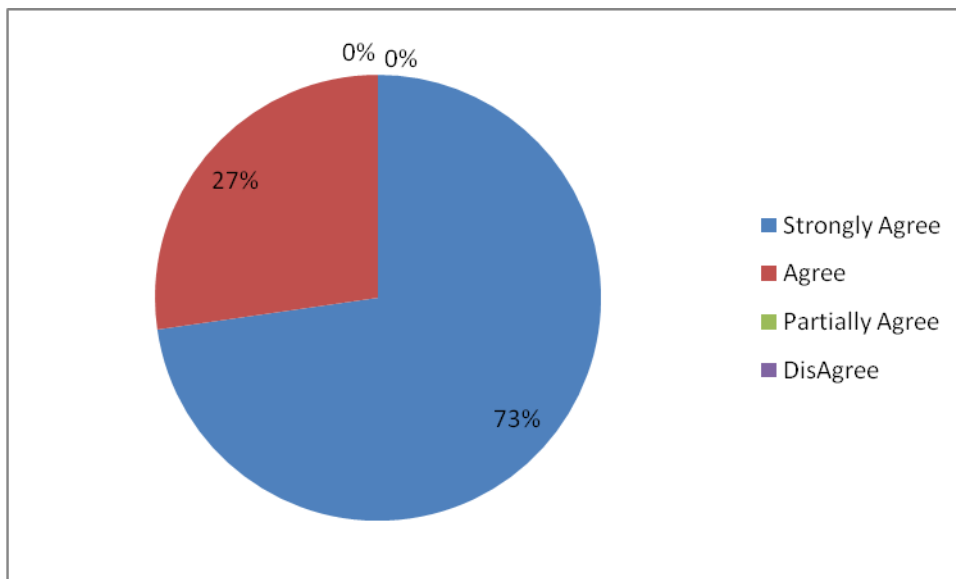

7. Availability of the learning resources (Library/Journals/e-Resources/Lab)

8. Contents offered in the syllabus are in relation to the technological advancements/current trends
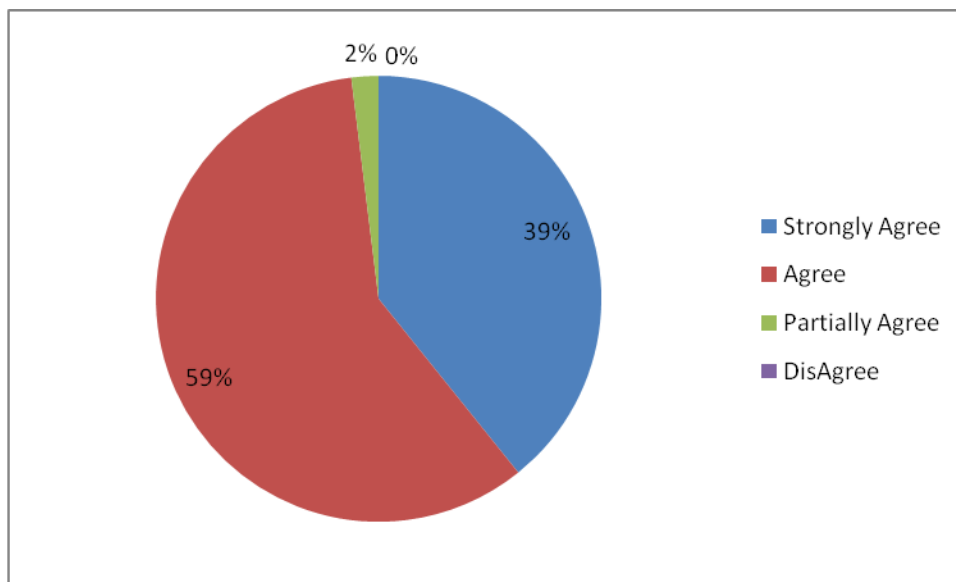

9. Assessment pattern of the course is satisfied for students to gain knowledge / skills / values & attitude
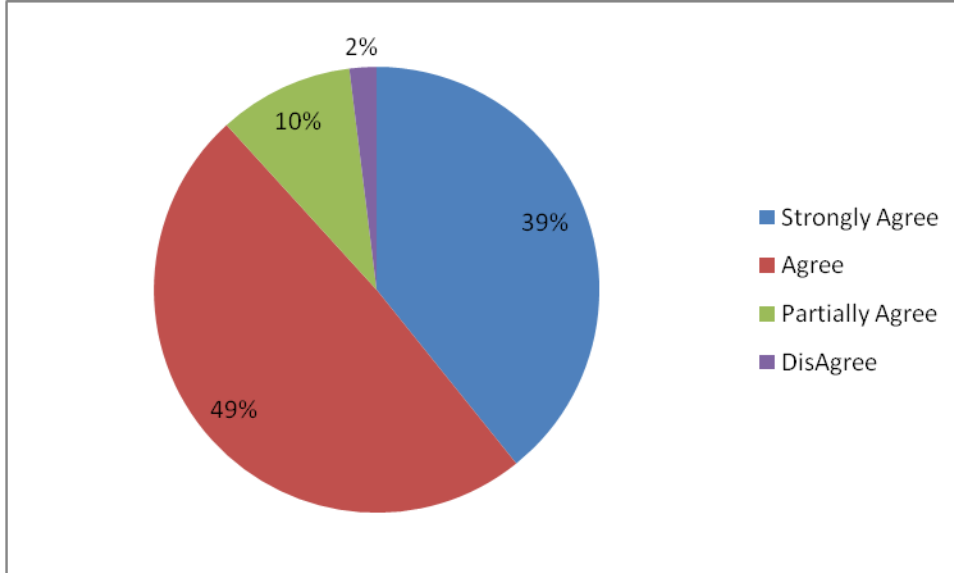

10. Write the suggestions for improvement of the course a) Contents to be added b) Contents to be deleted c) Contents to be modified d) Any other

Course Code	Course Title	Suggestions
19UCO620	Management Accounting	Need current trends in subject
19UCO621	E-Commerce and Information security	Need to improve in technical side, because the technology is increasing in a large platform,but the way of teaching and syllabus is in a old form.
19UCO624	Financial management and services	Good
19UCO625	Service Marketing And Consumer Relationship Marketing	Update new techniques
