SCENE 1

(Adhiti is getting ready to go to the school)

ADHITI : Mom ! It's getting late , I'm leaving.

MOM : Ok dear. Take Care.

SCENE 2

(Adhiti leaves to school with her friend. The boys notice her)

SCENE 3

(While Adhiti returns to home the boys bullies her and tries to stop her, she escapes from them and reaches her home in hurry!)

SCENE 4

(Adhiti enters the home and she explains the incident to her mom)

ADHITI : Mom! Mom !

MOM : What happened ?

ADHITI : The boys tortured me, they try to block my way mom.

MOM : Why did you talk to the boys ?

ADHITI : Mom, they are the one who bullyed me.

MOM : You should be more careful next time.

ADHITI : Mom, it was there fault. They tried to block my way.

Mom : Boys will be like that . You should be more careful.

ADHITI : The problem is with them , not with me.

MOM : **GIRLS** should be more aware! You should take care of yourself.

SCENE 5

(Adhiti is haunted by the memories of that incident. It doesn't let her to be at peace)

SCENE 6

Adhiti notices the boy from her terrace and she thinks,
See how happy they are?

I'm confined to these 4 walls, I can't face the society.

But, they are still happy even after their mistake.

VOICE OVER:

Why the society is in this way?

Why a women is always questioned?

Why a man is not questioned?

Will our society change?

Can we change our society?

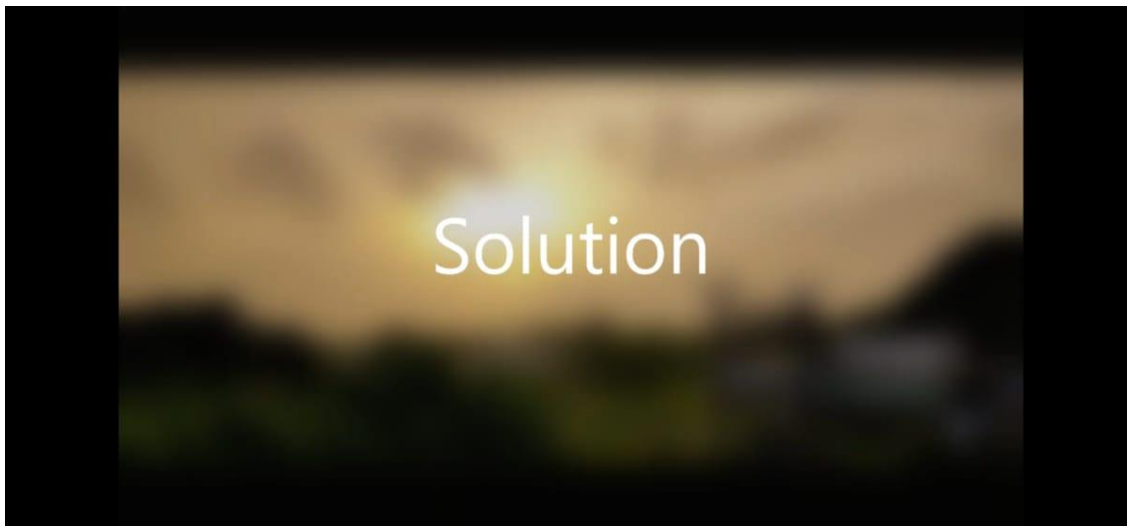

Why a women is questioned for a man's mistake?

Why a women is held responsible for his mistake?

Will this society change in the future?

Can we change this?

Let's Hope for a better society.

IoT Objective

Internet of Things (IoT) is a new revolution of the Internet and a hot technology worldwide. Government, academia, and industry are involved in different aspects of research, implementation and business with IoT. IoT cuts across different application domain verticals ranging from civilian to defense sectors. These domains include agriculture, space, healthcare, manufacturing, construction, water, and mining, which are presently transitioning their legacy infrastructure to support IoT.

The objective of the Workshop is to impart knowledge in the field of Internet of Things through which one will get a better understanding on basic architecture of IoT platform with open source softwares.

Knowledge and Understanding after completion of this Programme

- Knowledge and understanding of fundamental IOT paradigms, architectures, possibilities and challenges, both with respect to software and hardware.
- Learn the basics of Internet of Things and its applications.
- How open platforms allows to store sensor data in the Cloud.
- The basic usage of the Arduino environment for creating embedded projects
- Live Demonstration and Hands on session(IR sensor, Soil moisture sensor, Vibration detection sensor)

Benefits/Takeaways / Motivation

- Hands on experience on IOT using Arduino and Raspberry Pi apply the acquired skills to in application development and research
- Bring-up entrepreneurs and innovators

Hands-on Session was given by Mrs. M. Dhavapriya and Mr. N. Arulkumar and Introduction session by Mrs. S. Sharmila from Dept. of Computer Science (SF).

Feedback

Participants provided feedback that has been analyzed and the salient features are documented. The workshop concluded with a summary discussion among participants and suggestions for next steps.
