Department of Zoology

Vision

Enlightening the students with total dedication to bring out the hidden skills, creativity and human excellence with due emphasis on knowledge about recent development in the field of biology and mould them as responsible citizens.

Mission

Metamorphosing the students holistically through seminars, symposia, guest lectures, group discussions, shared class experiences, assignments, nature club, job opportunities, and healthy practices to express the excellence within.

Program Educational Objectives:

PEO1	**Enhanced the professional skills by means of continuous education and development.**
PEO2	**Express a mastery of discipline, precise information and exhibit analytical and practical skills. Exhibit professional interigrity and the capability for ethical decision making**
PEO3	**Graduate will recognize the need and apply their knowledge in general and various discipline areas.**
PEO4	**Pursue lifelong learning and continuous improvement of their knowledge and skills in the diverse field with the highest professional and ethical standards.**
PEO5	**Skill to function on multidiscipline environment to meet desired needs within realistic constraints such as environmental, social, ethical, health, safety, and sustainability**

Program Outcomes:

PO1	**Scientific Temper, Individual and Team Work Communication** Students gain information and skill in the fundamentals of animal sciences, understands the multifarious connections along with different living organisms.
PO2	**Inter-disciplinary Exposure** Students achieve knowledge of internal structure of cell, its functions in control of various metabolic functions of organisms. Correlates the physiological, Biochemical processes of animals and relationship of organ systems.
PO3	**Education and Society Environment and Sustainability** Understanding of environmental conservation processes, pollution control methods and its importance. Students also gain knowledge and awareness about biodiversity as well as the importance of protection of endangered species.
PO4	**Vocational and Industry Exposure** Understands about various concepts and importance of Biotechnology, Bioinformatics, Genetics, Genetic engineering in industry and day today human life.
PO5	**Problem Analysis** Students will be able to compare and distinguish the characteristics of animals that discriminate them from other forms of life.
PO6	**Innovation and Entrepreneurship** Achieve knowledge in applied fields like Sericulture, Aquaculture and Apiculture alongside Statistical and Laboratory techniques.
PO7	**Life-long Learning** Understanding of Zoology to one's own life and apply the knowledge judicially and remain constantly employable.

Program Specific Outcomes:

PSO – 01	To understand the life of organisms with their diversity, morphological, ecological, physiological and evolutionary significance at cellular and molecular level.
PSO – 02	To understand the principals and applications of zoology in daily life by equipping practical and field based study knowledge.

Continuous Internal Assessment for Project / Internship

The Final year students should undergo a project work during (V/VI) semester

- The period of study is for 4 weeks.
- Project / Internship work has to be done in an industrial organization (or) work on any industrial
- Problem outside the organization is allowed.
- Students are divided into groups and each group is guided by a Mentor.
- The group should not exceed four students, also interested student can undergo individually.
- A problem is chosen, objectives are framed, and data is collected, analyzed and documented in the form of a report / Project.
- Viva – Voce is conducted at the end of this semester, by an External Examiner and concerned
- Mentor (Internal Examiner).
- Project work constitutes 100 marks, out of which 50 is Internal and 50 is External Marks.

D. Write descriptive notes:

1) *Taenia solium* – Scolex
2) Earth worm - setae
3) Penaeus
4) Pila – Radula
5) Sea horse
6) Rhacophorous
7) Draco
8) Cobra
9) Monotremes - Echidna
10) Marsupials – Kangaroo

3. Field visit and report submission along with record **Field Visit/Project (Select A or B option)** The student has to maintain a log book showing the progress of the field/project work, duly signed by the supervising teacher and may be shown to the external examiner at the time of end of semester practical examination. **A. Individual activity** Identification of invertebrate and vertebrate species available in our area/field without disturbing the natural habitat Field/project/tour report and photographs to be submitted **B. Group Activity** A maximum of three students can choose any one group of activity any matter of zoological interest and submit the report for external practical examination. **Viva** Experiences of field visit and report preparation should be present.

Course Objectives

To be able to perform experiments using the common tools of cell biology and the basic concepts in genetics.

Course Outcomes

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Remember the concepts of genetics through experiments.	K1
CO2	Understand the practical experience in instrument handling	K2
CO3	Apply the laboratory test outcomes and determine the validity of the test results obtained.	K3
CO4	Analyse the different stages of cell divisions and genetic disorders in human	K4
CO5	Evaluate the role of chromosomes in sex determination and inheritance of X and Y linked genes	K5

Course objectives

Recognize the foundation, techniques, applications of Biotechnology

Course Outcomes

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge level
CO1	Impart the knowledge of principles and practices in biotechnology.	K1
CO2	Understanding the various tools and technique used in biotechnology	K2
CO3	Apply the various technologies on genetically modified organisms .	K3
CO4	Assorted the different culture method and instrument used in biotechnology	K4
CO5	Evaluate the clonal propagation of animal in commercial scale	K5

Units	Content	Hrs
Unit I	• Scope and importance of Biotechnology • Plasmids pBR 322 • Cosmids • Transposons • Construction of recombinant DNA • Recombinant Vaccines	**15**

Unit II	• **Principle and applications of blotting Techniques**
	  ○ Southern Blotting
	  ○ Northern Blotting
	  ○ Western Blotting
	• Polymerase Chain Reaction (PCR)
	• DNA Finger printing
	• *Genomic library**
		15

Unit III	• **Principle and applications of** • *Biolistics* • Hybridoma technology • Transgenic Mice ○ Microinjection method • Applications of transgenic animals • Genetically modified organisms - Mice and Sheep • Primary and secondary cell lines	**15**

Unit IV	• Tissue culture
	  o Culture media
	  o Culture of animal tissues
	• Bioreactors
	  o Selection and modification of animal(Pig)
	  o Applications of bioreactor
	• Scope and application of nano- biotechnology

EXPERIMENTS

- Analysis of excretory products
- Total count of RBC
- Total count of WBC
- Estimation of haemoglobin by using haemoglobinometer
- Preparation of Blood smear
- Bleeding and clotting time
- Estimation of Erythrocyte Sedimentation(ESR) in human
- Find the mean and Standard deviation of the given samples
- Estimation of glucose by using digital method

SPOTTERS

Developmental Biology

- Egg of frog
- Cleavage of frog
- Blastula of frog
- Chick embryo - 24 hours

- Chick embryo - 72 hours
- Chick embryo - 96 hours
- Placenta of sheep
- Human foetus

Biostatistics and Biophysics

Course Objective

To obtain practical knowledge in ecology, evolution, biotechnology, microbiology by doing experiments on physico-chemical characters of environment and also uptaining the real time visualsing the appliances used in sericulture and aquaculture

Course Outcomes

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Apply the knowledge on Ecology, Evolution concepts in real time experiments	K3
CO2	Analyse the different water quality parameters, microbial culture and morphometric measurement of fish.	K4
CO3	Understand the techniques and the same in Biotechnology and Microbiology experiments	K5
CO4	Analyse the real time problems in Sericulture and Aquaculture	K4
CO5	Understand the environment quality and critically evaluvate and solve	K6

Units	Content	Hrs

Unit I	• Introduction and scope of microbiology
	• Classification of Bacteria, virus, Fungi
	• **Basic methods in Microbiology**
	  ○ Pure culture - purification techniques
	  ○ Types of culture media
	  ○ Preparation of Culture media
	  ○ Culture techniques of microorganisms
	  ○ Bacterial growth and Growth curve
	• **Staining procedure and types of staining**
	• **Sterilization, Isolation and Maintenance of Microbes**
		15

Unit II	• **Bacteria**:
	  ○ Major features and structure of bacteria
	  ○ Economic importance of bacteria
	• **Viruses**:
	  ○ Characteristic and structure of viruses
	  ○ Structure of Bacteriophage
	• **Applied microbiology**
	  ▪ **Agricultural microbiology**:
	  ▪ Role of microorganism in soil fertility
		15

	▪ Biofertilizers-Rhizobium ▪ Role of microorganism in agriculture	
Unit III	• **Food microbiology**: ▪ Food spoilage ▪ Food borne diseases, ▪ Food borne infections ▪ Food borne intoxicans ▪ *Food preservation** • **Medical microbiology** ▪ Bacterial Diseases -TB, Cholera ▪ Viral Diseases – Measles, Covid19 ▪ Fungal Diseases- Cutaneous and systemic mycoses • **Industrial Microbiology** ▪ Fermentor design ▪ Microbial Selection,ethanol and penicillin Production	**15**
Unit IV	• **Immunology** o Introduction and scope of immunology • **Classification of Immunity** o Innate Immunity o Acquired Immunity • **Immune Response** o Mechanism of Humoral immune response o Mechanism of Cell mediated immune response • **Lymphoid Organs** o Primary lymphoid organs o Secondary lymphoid organs	**15**
Unit V	• **Cells of the immune system** o Lymphoid lineage o Myeloid lineage • **Immunoglobulins** o Structure of immunoglobulin o Classes and properties of immunoglobulin • **Major Histocompatibility complex-Classification of MHC** • **Tumor immunology** o Types of tumor o *Properties and causes of tumor cells** o Causes of tumour o Factors involved in tumor immunity o Immune diagnosis and immunotherapy of tumor	**15**

Course Objectives

To acquire knowledge in CSB, moriculture, silkworm rearing and reeling techniques.

Course Outcomes

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Remember the historical background and importance of Sericulture	K1
CO2	Get the idea for increasing cocoon productivity and to prevent silkworm diseases	K2
CO3	Execute the construction of rearing house and self employment in silkworm rearing	K3
CO4	Analyze this course for employment and job opportunities in the public, private and Govt.sectors	K4
CO5	To Assess the Knowledge of moriculture and sericulture.	K5

Group Project and Viva Voce

Each faculty will be allotted 5 students. A specific problem will be assigned to the students. The topic/area of work will be finalized at the end of IV semester, allowing scope for the students to gather relevant literature during the vacation. The research work will be carried out based on the objective of the project and viva voce/presentation will be conducted by a panel comprising of HOD, internal examiners. A power point presentation by the student group will be evaluated on the basis of students' response to the questions.

Area of Work

Limnology, Pollution studies, Clinical studies, Molecular Biology, Fish Toxicology, Microbiology, Entomology, Environmental Science, Biotechnology, Bioinformatics, Cancer Biology.

Methodology

Each project should contain the following details:

- Brief introduction on the topic
- Review of Literature
- Materials and Methods
- Results and Discussions – evidences in the form of figures, tables and photographs
- Conclusion / Summary
- Bibliography

The above contents should not exceed 50 pages

				Advanced Learner Course- Zoology for Competitive Exams	**Semester:**	VI
Lecture Hrs./Week	-	**Tutorial Hrs./Sem.**	--		**Credits:**	5*

Course Objective

To acquire the comprehensive knowledge of zoology to achive the competitive examinations .

Course Outcomes

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Remember the basic concepts of emerging fileds of zoology	K1
CO2	Understand the Knowledge about different fields of zoology	K2
CO3	Analyse the principles and concepts of zoology	K3
CO4	Deploy the zoology knowledge to competitive examinations	K4
CO5	Assess the various methods and tools to remember the zoology topics	K5

Units	Content	Hrs
Unit I	**GENETICS** Mendelian principles - Concept of gene : Allele, multiple alleles, pseudoallele, complementation tests -linkage and crossing over, sex linkage, sex limited and sex influenced characters. -Extra chromosomal inheritance - Human genetics : Pedigree analysis, lod score for linkage testing, karyotypes, genetic disorders. Mutation : Types, causes and detection, mutant types – lethal, conditional, biochemical, loss of function, gain of function, germinal verses somatic mutants, insertional mutagenesis.	
Unit II	DEVELOPMENTAL BIOLOGY Basic concepts of development – Gametogenesis -fertilization and early development: zygote formation, cleavage, blastula formation- Morphogenesis and organogenesis in animals	
Unit III	ANIMAL PHYSIOLOGY Blood and circulation - Cardiovascular System: - Respiratory system - Nervous system - Sense organs - Excretory system - Digestive system - Reproductive system - Endocrine glands.	
Unit IV	ECOLOGY The Environment - Population Ecology- Species Interactions- Community Ecology- Ecological Succession-Ecosystem structure- Biogeography- Applied Ecology- Environmental pollution; -Conservation Biology	

Unit V	EVOLUTION AND BEHAVIOUR Emergence of evolutionary thoughts Lamarck; Darwin–concepts of variation, adaptation, struggle, fitness and natural selection; Mendelism; Spontaneity of mutations-Evolutionary synthesis- Origin of cells and unicellular evolution-Experiement of Miller (1953-Paleontology and Evolutionary History-Molecular Evolution: Concepts of neutral evolution; Molecular tools in phylogeny, classification and identification; Protein and nucleotide sequence analysis; origin of new genes and proteins; Gene duplication and divergence-Mechanisms: Population genetics.

Course Objective

To study the biological systems to understand the actual path of metabolism of drugs and the method of drug discovery, Quality assurance and control such as DNA technology and probiotics.

Course Outcomes

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Keep in mind the Routes of administration in biological systems and models	K1
CO2	Understand the drug metabolism	K2
CO3	Implement the microbial products in pharmaceutical industry	K3
CO4	Discuss the DNA technology in Pharmaceutical products	K4
CO5	Acquire the knowledge abouta uses of probiotics	K5
