

**NALLAMUTHU GOUNDER MAHALINGAM COLLEGE
(AUTONOMOUS) POLLACHI - 642 001.**

M.Sc., BOTANY

**SYLLABUS
&
SCHEME OF EXAMINATION**

OUTCOME BASED EDUCATION (OBE)

**[FOR THE STUDENTS ADMITTED DURING THE
ACADEMIC YEAR 2021-2023 BATCH & ONWARDS]**

NGM COLLEGE (AUTONOMOUS)

Vision

Our dream is to make the College an Institution of Excellence at the national level by imparting quality education of global standards to make students academically superior, socially committed, ethically strong and culturally rich citizens to contribute to the holistic development of the self and society.

Mission

Training students to become role models in academic arena by strengthening infrastructure, upgrading extension through an enlightened management and committed faculty who ensure knowledge transfer, instill research aptitude and infuse ethical and cultural values to transform students into disciplined citizens in order to improve quality of life.

PG AND RESEARCH DEPARTMENT OF BOTANY

Vision

Our vision is to perform cutting-edge education, research and outreach on the patterns and processes of life, with a particular emphasis on plants and their habitats.

Mission

Our mission is to make students become scientifically well-trained and highly skilled botanists and on cutting edge technologies in life sciences and make good citizens with environmental and social concern.

SCHEME OF EXAMINATION

Semester	Course Code	Course Title	Class hours /Week		Exam Hrs	Maximum marks			Credits
			T	P		CIA	ESE	Total	
			Total			24	6		
I	21PBY101	Core – 1 Plant Diversity I (Phycology, Mycology, Lichenology and Bryology)	6	3	3	50	50	100	4
	21PBY102	Core – 2 Plant Diversity II (Pteridophytes, Gymnosperms and Palaeobotany)	6	2	3	50	50	100	4
	21PBY103	Core - 3 Applied Microbiology and Plant Pathology	6	1	3	50	50	100	4
	21PBY104	Core - 4 Laboratory course-I (for core courses 1, 2, 3)	-	6	4	50	50	100	4
	21PBY1E1/ 21PBY1E2/ 21PBY1E3	Elective -1 Ecology and Phytogeography/ Economic Botany/ Seed technology	6	-	3	50	50	100	4
II	21PBY205	Core - 5 Plant Anatomy and Reproductive Biology	6	3	3	50	50	100	4
	21PBY206	Core - 6 Plant physiology	6	2	3	50	50	100	4
	21PBY207	Core – 7 Cytology, Genetics and Plant Breeding	5	1	3	50	50	100	4
	21PBY208	Core - 8 Laboratory course-II (for core courses 5,6,7)	-	6	4	50	50	100	4

	Certificate Course - II	2	40	50	50	100	2
The scholastic courses are only counted for the final grading and ranking. However for the award of the degree, the completion of co-scholastic one online course is mandatory. All other co-scholastic courses are optional only.							

Question Paper Pattern (Based on Bloom's Taxonomy)

K1-Remember; K2- Understanding; K3- Apply; K4-Analyze; K5- Evaluate

1. Theory Examinations: 70 Marks

(i) Test- I & II, ESE:

Knowledge Level	Section	Marks	Description	Total
K1 & K2 (Q 1 -10)	A (Q 1 – 5 MCQ) (Q 6–10 Define/Short Answer)	10 x 1 = 10	MCQ Define	70 (Reduced to 50 for ESE)
K3 (Q 11-15)	B (Either or pattern)	5 x 4 = 20	Short Answers	
K4 & K5 (Q 16 – 21)	C (Q -16 is Compulsory and Q 17 – 21 answer any 3)	4 x 10 = 40	Descriptive/ Detailed	

2. Theory Examinations: 50 Marks (NME)

Knowledge Level	Section	Marks	Description	Total
K1 & K2 (Q 1 -10)	A (Q 1 – 5 MCQ) (Q 6–10 Define / Short Answer)	10 x 1 = 10	MCQ Define	50 (Reduced to 25 for ESE)
K3, K4 & K5 (Q 11-18)	B (Answer 5 out of 8)	5 x 8 = 40	Short Answers	

3. Practical Examinations: 100Marks

Knowledge Level	Criterion	External/Internal Marks	Total
K3	Record work & Practical	50/50	100
K4			
K5			

* In Theory ESE, Students will write Examination Maximum Marks as 70 and it will be reduced to 50 for Total Mark calculation.

Components of Continuous Assessment

THEORY

Maximum Marks: 100; CIA Mark: 50

Components		Calculation	CIA Total
Test 1	$(70 / 4.67) = 15$	15+15+10+05+05	50
Test 2 / Model	$(70 / 4.67) = 15$		
Assignment / Digital Assignment	10		
Seminar / Socratic Seminar	05		
Group Task : GD, Role Play, APS	05		

PRACTICAL

Maximum Marks: 100; CIA Mark: 50

Components		Calculation	CIA Total
Test / Model	30	30+5+15	50
Observation Note	5		
Record	15		

PROJECT

Maximum Marks: 100; CIA Mark: 50

Components		Calculation	CIA Total
Review I	10	10+10+10+20	50
Review II	10		
Review III	10		
Report Submission	20		

STUDENT SEMINAR EVALUATION RUBRIC

Grading Scale:

A	B	C	D
5	4	2 - 3	0 - 1

CRITERIA	A - Excellent	B - Good	C - Average	D - Inadequate
Organization of presentation	Information presented as interesting story in logical, easy to follow sequence	Information presented in logical sequence; easy to follow	Most of information presented in sequence	Hard to follow; sequence of information jumpy
Knowledge of subject & References	Demonstrated full knowledge; answered all questions with elaboration & Material sufficient for clear understanding AND exceptionally presented	At ease; answered all questions but failed to elaborate & Material sufficient for clear understanding AND effectively presented	At ease with information; answered most questions & Material sufficient for clear understanding but not clearly presented	Does not have grasp of information; answered only rudimentary Questions & Material not clearly related to topic OR background dominated seminar
Presentation Skills using ICT Tools	Uses graphics that explain and reinforce text and presentation	Uses graphics that explain text and presentation	Uses graphics that relate to text and presentation	Uses graphics that rarely support text and presentation
Eye Contact	Refers to slides to make points; engaged with audience	Refers to slides to make points; eye contact majority of time	Refers to slides to make points; occasional eye contact	Reads most slides; no or just occasional eye contact
Elocution – (Ability to speak English language)	Correct, precise pronunciation of all terms Voice is clear and steady; audience can hear well at all times	Incorrectly pronounces few terms Voice is clear with few fluctuations; audience can hear well most of the time	Incorrectly pronounces some terms Voice fluctuates from low to clear; difficult to hear at times	Mumbles and/or Incorrectly pronounces some terms Voice is low; difficult to hear

WRITTEN ASSIGNMENT RUBRIC

Grading Scale:

A	B	C	D	F
09 - 10	07- 08	05 - 06	03 - 04	01 - 02

CRITERION	A - Excellent	B - Good	C - Average	D - Below Average	F- Inadequate
Content & Focus	Hits on almost all content exceptionally clear	Hits on most key points and writing is interesting	Hits in basic content and writing is understandable	Hits on a portion of content and/or digressions and errors	Completely off track or did not submit
Sentence Structure & Style	<ul style="list-style-type: none"> * Word choice is rich and varies * Writing style is consistently strong * Students own formal language 	<ul style="list-style-type: none"> * Word choice is clear and reasonably precise * Writing language is appropriate to topic * Words convey intended message 	<ul style="list-style-type: none"> * Word choice is basic * Most writing language is appropriate to topic * Informal language 	<ul style="list-style-type: none"> * Word choice is vague * Writing language is not appropriate to topic * Message is unclear 	* Not adequate
Sources	Sources are cited and are used critically	Sources are cited and some are used critically	Some sources are missing	Sources are not cited	Sources are not all cited
Neatness	Typed; Clean; Neatly bound in a report cover; illustrations provided	Legible writing, well-formed characters; Clean and neatly bound in a report cover	Legible writing, some ill-formed letters, print too small or too large; papers stapled together	Illegible writing; loose pages	Same as below standard
Timeliness	Report on time	Report one class period late	Report two class periods late	Report more than one week late	Report more than 10 days late

Industrial Training / Internship

The students may undergo industrial training for a period as specified in the Curriculum during summer/winter vacation. In this case, the training has to be undergone for 7-14 days period.

The students may undergo Internship at Research organization / University (after due approval from the Department Consultative Committee) for the period prescribed in the curriculum during summer / winter vacation, in lieu of Industrial training.

Mark Split UP

Internal	External	Total
25	25	50

Industrial Training / Internship for students is evaluated for 50 marks out of which 25 marks are given by supervisor, HOD and 25 marks by external examiner.

Field / Industry / Institute visit

Every student is required to go for at least one Field / Industry / Institute visit every year of the Programme. The Heads of Departments shall ensure that necessary arrangements are made in this regard.

Mark Split UP

Internal	External	Total
25	25	50

Field / Industry / Institute visit for students is evaluated for 50 marks out of which 25 marks are given by HOD and 25 marks by external examiner.

Guidelines for Project

The final year students should undergo a project work during IV semester

- ❖ The period of study is for 2-3 Months.
- ❖ Work on the project must be done in the department laboratory (or) work on any industrial problem outside the organization is permitted.
- ❖ Students are divided into groups and each group is guided by a mentor.
- ❖ The group should not exceed four students, also interested student can undergo individually.
- ❖ A problem is chosen, objectives are framed, and data is collected, analyzed and documented in the form of a report / Project.
- ❖ Viva – Voce is conducted at the end of 4th semester, by an external examiner and concerned mentor (Internal Examiner).
- ❖ Project work constitutes 100 marks, out of which 50 is internal and 50 is external marks.

Mark Split UP

Internal	External	Total
50	50	100

S. No	Internal Components	Marks
1	Review - I	10
2	Review - II	10
3	Review - III	10

2	Relevance to Current Trend	05
3	Candidate Involvement	05
4	Thesis Style / Language	05
5	Presentation of Report	10
6	Viva-Voce	20
Total		50

Program Educational Objectives (PEOs)	
The M. Sc. Botany program describe accomplishments that graduates are expected to attain within five to seven years after graduation	
PEO 1	Postgraduate students are prepared to apply new ideas in the field of biological science and to become an entrepreneur
PEO 2	Postgraduate students are trained to take up higher learning programmes in research
PEO 3	Postgraduate students are known about the organization of plants and their role in Human Welfare
PEO4	Postgraduate students are prepare for competitive examinations, especially UGC-CSIR NET, SET and TNPSC Examinations.
PEO5	Postgraduate students are perform their competency with professional ethics in their working place.

Programme Outcomes

On successful completion of the M. Sc. Botany program, the students are expected to	
PO1	Apply the fundamental knowledge of science and technology for solving complex problems.
PO2	Ensure the use of advanced tools and techniques in understanding the scope and significance of Botany.
PO3	Develop the scientific problem solving skills during experimentation, research projects, analysis and interpretation of data.
PO4	Exploration of diverse plant life-forms, anatomical, Physiological and Biochemical disciplines and to conserve the biodiversity.
PO5	Enhanced capacity to think critically; ability to understand, design and execute experiments independently and/or team under multidisciplinary settings
PO6	Design and standardize protocols for public health and safety, and cultural, societal and environmental considerations.
PO7	Apply appropriate techniques, resources, and modern ICT tools for understanding plant resources.
PO8	Demonstrate the contextual knowledge in sustainable exploitation of medicinal, economically important and endangered plants as per the National Biodiversity Act.
PO9	Follow the concept of professional ethics and bioethics norms for practicing the value of plant kingdom
PO10	Communicate proficiently with various stakeholders and society, to comprehend and to write and present reports effectively

Programme Specific Outcomes

After the successful completion of M.Sc., Botany program the students are expected to	
PSO1	Acquire deep knowledge of botanical terms, facts, concepts, theories and principles of plant sciences and become a good academician and a successful researcher.
PSO2	Relate their knowledge of advanced techniques in biological science to careers in a variety of fields.

OBE Rubric Mapping System

The attainment level of the students as Low, Medium, High is replaced by the numerals as 1,2 and 3

Programme code	M.Sc.	Programme Title : Master of Science in Botany		
Course Code: 21PBY101	6	Title: Core - 1 Plant Diversity I (Phycology, Mycology, Lichenology and Bryology)	Batch	2021 -2023
Hrs/Week:			Semester	I
	Credits		4	

Course Objective

The main objectives of this course are to:

- Study the classification, characteristic features, distribution, and reproduction cycle of algae, fungi, lichens and bryophytes.
- Know the ecological and economic importance of algae, fungi, lichens and bryophytes
- Understand the concept of lichens and bryophytes as indicator for air pollution

Course Outcomes (CO)

On the successful completion of the course, student will be able to:		
CO1	Remembering the values of lower plant forms and its diversity	K1
CO2	Will get an idea on evolution of lower plants and its architectural specialization in cells	K2
CO3	Apply economic values of lower plants to manufacture value added products	K3
CO4	Review the developmental stages of lower group of plant diversity	K4
CO5	Understand and learn the classification and economic importance of lower plants	K2&K4
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 – Evaluate		

Unit	Content	Hrs
Unit I	Phycology: Phycology – introduction - history - definition- classification of algae (Fritsch, 1945) – Phylogeny and interrelationship – thallus organization (range of thallus), evolution of thallus in green algae- reproduction (vegetative, asexual, sexual) - modes of perennation- Ultra structure of cell, flagella, chloroplast, pyrenoids and eye Spot in major groups of algae- algae in diverse habitats (terrestrial, fresh water, marine)- algae distribution in India - life cycle patterns in algae and algal blooms - <i>*economic importance of algae as food - bio-fuels - source of chemicals and drugs - algal bioinoculants.</i>	14
Unit II	Comparative study of classes of Cyanophyceae, Chlorophyceae, Xanthophyceae, Bacillariophyceae, Phaeophyceae and Rhodophyceae with reference to range of structure of plant body including - ultra structure - methods of reproduction and variations in life cycles - life histories of <i>Nostoc, Caulerpa, Vaucheria, Diatoms, Padina</i> and <i>Gracilaria</i> - Culture and cultivation of fresh and marine algae- fossil algae.	14
Unit III	Mycology: General Characteristics - classification of fungi (J. Alexopoulos and C.W. Mims 1979) - cell wall composition, mode of nutrition- range of structure, Heterothallism, reproduction and interrelationship of Myxomycetes, Oomycetes, Zygomycetes, Ascomycetes, Basidiomycetes and Deuteromycetes -structure and life-histories of <i>Plasmodiophora, Phytophthora, Rhizopus, Penicillium, Pleurotus</i> and <i>Cercospora</i> - ecology of fungi (Habit and Habitat) - VAM Ecto and endophyticmycorrhiza - economic importance of fungi- fossil fungi - comparison of algae and fungi.	14

Unit IV	Lichenology: Origin and evolution of lichens - classification of Lichens (Miller, 1984) - thallus types and structure - occurrence and Inter-relationship of Phycobionts and Mycobionts - structure and reproduction in Ascolichens, Basidiolichens and Deuterolichens – Lichens as indicators of pollution - ecology of lichens- economic importance of lichens.	15
Unit V	Bryology: Classification(Proskauer, 1957), general and reproductive characters of major classes -distribution of bryophytes - comparative study of gametophytes and sporophytes of major classes -Hepaticopsida: <i>Marchantia</i> , <i>Porella</i> , Anthocerotopsida: <i>Anthoceros</i> , Bryopsida: <i>Sphagnum</i> and <i>Polytrichum</i> - alternation of generations in the life-cycle of bryophytes- Economic importance of bryophytes- bryophytes as pollution indicators- fossil bryophytes.	15

Programme code	M.Sc.	Programme Title : Master of Science in Botany		
Course Code: 21PBY102	Title: Core – 2 Plant Diversity II (Pteridophytes, Gymnosperms and Palaeobotany)		Batch	2021-2023
Hrs/Week:			6	Semester
			Credits	4

Course Objective

The main objectives of this course are to:

- To understand the composition level of plant diversity emphasized in ecological, organizational, genetic and cultural.
- To realized the fundamental values of diversity and their importance of human welfare.
- To define and characterize diversity of lower vascular plants to understand the dynamics of diversity to realize the significance of diversity.

Course Outcomes (CO)

On the successful completion of the course, student will be able to:		
CO1	Remember the diverse forms of plants in the plant kingdom	K1
CO2	Understand the life cycles of vascular plants	K2
CO3	Discover the importance of vascular plants to the Human community	K3
CO4	Connect the lower plants and higher plants by phylogenetic study	K4
CO5	Review the evolutionary idea of fossil diversity	K4
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 – Evaluate		

Unit	Content	Hrs
Unit I	Pteridophytes: Introduction - classification of Pteridophytes (Sporne, 1970) - characteristic features and types of life cycles in Pteridophytes - comparative account of sporophytes, gametophytes and embryogeny in Psilotopsida, Lycopsidea and Sphenopsida.	14
Unit II	Comparative account of sporophytes - gametophytes and embryogeny in Pteropsida - types of steles and their evolution in Pteridophytes - telome theory- heterospory and seed habit - apospory, apogamy and parthenogenesis - <i>*economic importance of Pteridophytes - origin and evolution of Pteridophytes.</i>	14
Unit III	Gymnosperms: Introduction – classification of Gymnosperms (Sporne, 1974) – characteristic features and life cycles of Gymnosperms. Comparative study of morphology, anatomy, reproduction and phylogeny of Ephedrales, Pteridospermales, Bennettiales, Pentoxylales, Cycadales, Corditales and Taxales.	15
Unit IV	Comparative study of morphology, anatomy, reproduction and phylogeny of Ginkgoales and Gnetales –affinities of Gymnosperms with Angiosperms and Pteridophytes - <i>*economic importance of Gymnosperms</i>	14
Unit V	Palaeobotany: Concepts of Palaeobotany – a general account on Geological Time Scale - techniques for Palaeo botanical study- fossil types: compressions, Impression, incrustation, casts, molds, petrifications, coalballs and compactions- age determination and methods of study of fossils- systematic and nomenclature of fossil plants- role of fossil in oil exploration and coal excavation- Palaeopalynology.	15

Course Code: 21PBY103		Title : Core – 3 Applied Microbiology and Plant Pathology	Batch	2021-2023
Hrs/Week:	5		Semester	I
			Credits	4

Course Objective

The main objectives of this course are to:

- Provide students with the latest information in the field of microbiology and plant pathology.
- Explain the theoretical basis of the tools, technologies and methods commonly used in microbiology and plant pathology.
- Develop practical skills in the use microbiological methodologies, tools and techniques.

Course Outcomes (CO)

On the successful completion of the course, student will be able to:		
CO1	Recognize the different types of microorganisms present in an environment and their importance.	K1
CO2	Characterize and culture microorganisms present in soil, water and infected plant tissue using appropriate techniques.	K2
CO3	Demonstrate the role of microorganisms in food processing and spoilage	K3
CO4	Apply the microbial culture in manufacturing of value added products	K3
CO5	Assess role of microorganisms in plant diseases commonly occurring in crops	K4
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 – Evaluate		

Unit	Content	Hrs
Unit I	Microbiology: History, scope and branches of microbiology - a general account, classification, growth and reproduction of bacteria (Bergey's manual of classification), virus and protozoa - economic importance of microbes	14
Unit II	Microbiological Media: Media types - preparation- methods of sterilization- enumeration of microorganisms in soil and water - isolation of microorganisms from infected plant tissue- isolation of microorganisms from industrial waste - techniques of pure culture- maintenance and preservation of microbes- staining techniques - <i>*bacterial growth curve - nutritional types of microorganisms.</i>	15
Unit III	Food Microbiology: Single cell protein- fermented foods (pickles, silage, sausages and bread) - microbial spoilage of foods - food borne infections & intoxication - preservation of foods - preservation of milk and milk products - <i>* Food adulteration- identification of adulteration in foods-</i> concept of prebiotics and probiotics.	14
Unit IV	Industrial Microbiology: Fermenters - batch fermentation - continuous fermentation - industrial production of enzymes (amylase), amino acids (glutamic acid and L- Lysine), Antibiotics (penicillin), organic acids (lactic and citric acid) and biofuels (ethanol) - methods of cell and enzyme immobilization - applications of immobilized cells and enzymes - medicinal plants as antimicrobial agents.	14
Unit V	Pathology: Introduction to plant pathology – disease – concept, component and causes – Defense mechanisms in plants- plant diseases: symptoms, causative organisms and control measures of following diseases: Blast disease of Paddy - Red rot of Sugar cane - Late blight of Potato - Bunchy top of Banana - TMV- biotechnology in relation to plant pathology - agricultural terrorism.	15

Programme code	M.Sc.	Programme Title : Master of Science in Botany		
Course Code: 21PBY104	6	Title : Core - 4 Laboratory course -I (Phycology, Mycology, Lichenology and Bryology, Pteridophytes, Gymnosperms and Palaeobotany Applied Microbiology and Plant Pathology)	Batch	2021 – 23
Hrs/Week:			Semester	I
			Credits	4

Course Objective

The main objectives of this course are to:

- Acquire practical skills in the use of instruments, technologies and methods in microbiology, thallophytes and non-flowering plant groups.
- Provides opportunities to collect and examine samples from various environments.
- To compare the structural diversity of fossil and extant plant species.

Course Outcomes (CO)

On the successful completion of the course, student will be able to:		
CO1	Demonstrate practical skills in microbiology, thallophytes, pteridophytes and gymnosperms.	K3
CO2	Classify bacteria based on staining techniques as well as isolate, culture and characterize microorganisms from different substrates.	K4
CO3	Apply practical skills for Manufacturing of value added products from microbes and lower plants	K3
CO4	Analyze the morphological and anatomical features of lower plants.	K4
CO5	Execute the culture techniques in laboratories	K5
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 – Evaluate		

Part	Content	Hrs
Part 1	<p>Phycology, Mycology, Lichenology and Bryology</p> <ol style="list-style-type: none"> 1. Range of thallus structures in algae 2. Reproductive structures in algae 3. Collection of microalgae using phytoplankton net 4. Culturing of microalgae 5. Culturing of macro algae/seaweed (demo only) 6. Commercial products from macroalgae 7. Vegetative and reproductive structures of <i>Phytophthora, Rhizopus, Penicillium Pleurotus</i> and <i>Cercospora</i> 8. Fungal spore count using Haemocytometer. 9. Slide culture technique 10. Lichen - <i>Usnea</i> sp. 11. Morphological and anatomical study of bryophytes with reference to the following genera: <i>Marchantia, Anthoceros, Sphagnam</i> and <i>Polytrichum</i>. 12. Field trip for lower plant collection and submission of reports. 	45
Part 2	<p>Pteridophytes, Gymnosperms and Palaeobotany</p> <p>Study of morphology, anatomy and reproductive structures of the following genera:</p> <ol style="list-style-type: none"> 1. Pteridophytes: <i>Ophioglossum, Selaginella, Equisetum</i> and <i>Adiantum</i> 	30

	2. Gymnosperms: Ephedra, <i>Pinus</i> , <i>Araucaria</i> and <i>Gingko</i> . 3. Palaeobotany : Impression, Petrification, <i>Rhynia</i> , <i>Lepidodendron</i> , <i>Lepidocarpon</i> , <i>Williamsonia</i> , <i>Lagenostoma</i> , <i>Lyngiopteris</i> and Amber.	
Part 3	Microbiology and Plant Pathology 1. Preparation of Basic medium - solid agar and broth 2. Preparation of agar plates, agar slants and agar deep tubes. 3. Simple staining of bacteria. 4. Gram's staining of bacteria. 5. Isolation of Bacteria, Fungi from soil 6. Isolation of microorganisms from the infected plant tissues. 7. Subculture, pure culture and maintenance of culture. 8. Bacterial growth curve 9. Biochemical tests for bacteria 10. Micrometry 11. Production of Alcohol - chart. 12. Effect of antibiotics on pathogenic microorganism by Kerby - Bayer method. 13. Testing the milk quality - Methylene Blue Reduction Test (MBRT) 14. Identification of adulteration in foods 15. Pathology Submission of herbarium of infected plant specimens (not less than five)	15

Power point presentation, Specimen observation, Sectioning, Field/Industrial visit, Experience discussion and Case study

Programme code	M.Sc.	Programme Title : Master of Science in Botany		
Course Code:	21PBY1E1	Title : Elective -1 Ecology and Phytogeography	Batch	2021– 23
Hrs/Week:	5		Semester	I
			Credits	4

Course Objective

The main objectives of this course are to:

- Empower the student to know the concept and principle of ecology.
- Know the causes, effects and control measure of pollution.
- Learn Biodiversity conservation and management

Course Outcomes (CO)

On the successful completion of the course, student will be able to:		
CO1	Recall or remember environmental condition influenced by many factors	K1
CO2	Understand the applied aspect of environmental botany	K2
CO3	Apply their idea to protect the biodiversity	K3
CO4	Analyze insight into the vegetation types, species interaction and their importance and the factors influencing the environmental conditions	K4
CO5	Evaluate skills in biodiversity conservation through In- situ and Ex- situ.	K5
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate		

Unit	Content	Hrs
Unit I	History and Scope of Ecology. Concept of Ecosystem, its structure and function –types of ecosystem - Ecological factors; edaphic, climatic, topographic, biotic and abiotic factors- Energetics: productivity - energy flow and mineral cycling- carbon cycle; nitrogen cycle; phosphorous cycle.	14
Unit II	Ecological succession - Hydrosere, Xerosere. Bog succession, sand dune succession. Plant indicators - Terrestrial ecosystems, Fresh water ecosystem, Marine ecosystem. Biodiversity: cause for loss of Biodiversity, benefits, and conservation of (<i>in-situ</i> and <i>ex-situ</i>) Biodiversity, Phytosociological studies* <i>Biodiversity Hotspots (RET species)</i> .	14
Unit III	Environmental pollution –Causes, effect and control measures of Air, Water, Soil, Thermal, Radiation, Noise, E-waste and solid waste pollution; Cumulative effect of Pollution on global environment; * <i>Global warming</i> , climate change and its consequences – acid rain, ozone depletion – disaster management.	15
Unit IV	Environmental Impact Assessment (EIA) - Scope, importance and application of EIA process - eco-restoration/remediation-ecological foot prints - carbon foot print - ecolabeling - environmental auditing –application of remote sensing in ecological studies and GIS – environmental acts.	14
Unit V	Phytogeography - principles of plant geography - phytogeographic regions of India –latitudinal and longitudinal vegetations- continental drift hypothesis - Factors involved in distribution -Endemism, Age and Area hypothesis; dispersal and migration and their aims and methods.	15

Course Code:	21PBY1E2	Title : Elective -1 Economic Botany	Batch	2021 – 23
Hrs/Week:	5		Semester	I
			Credits	4

Course Objective

The main objectives of this course are:

- To study the economic importance of vegetables, fruits, spices, condiments, fibres, timber and oil yielding plants
- To know about the economic importance of medicinal plants

Course Outcomes (CO)

On the successful completion of the course, student will be able to:		
CO1	Understand the applied facet of botany	K2
CO2	Be familiar with the various commercial products of plant origin	K2
CO3	Apply and use of different plant families for human welfare	K3
CO4	Evaluate the medicinal and economic importance of plants.	K5
CO5	Understand and analyze about the economic importance of plants	K2 ,K4
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate		

Unit	Content	Hrs
Unit I	Cereals and legumes: Origin and History - Botanical description - Cultivation, Harvesting and uses of Cereals and Legumes: Wheat, Rice, Maize, Sorghum, Barley, Black gram, Red gram, Chick pea, Pigeon pea and Broad beans.	14
Unit II	Vegetables and fruits: Origin and History - Botanical description and economic importance of Vegetables and Fruits: Velvet bean, Canavalia, <i>Dioscorea</i> , <i>Litchi</i> , <i>Butter fruit</i> , <i>Dragon fruit</i> , <i>Elaeganus</i>	14
Unit III	Spices and condiments: Origin and History - Botanical description, Cultivation and uses of Spices and Condiments: Ginger, Pepper, Cardamom, Clove, Nut-Meg, Chilly, <i>Coriandrum</i> , Turmeric and All-spice.	15
Unit IV	Beverages plants, fibres and timber: Origin and History - Botanical description, Cultivation, Processing and uses of Beverages plants: Tea, Coffee and Cocoa. <i>Sugars and Starch:</i> Sugarcane and <i>Manihot</i> . Fibers and Timber: Cotton, Jute, Sunhemp, Rosewood, Ebony and Mahogany.	15
Unit V	Oil yielding plants: Origin and history - botanical description – harvesting - extraction and uses of fatty oils and vegetable fats: sun flower, soya bean, peanut, palm oil, coconut and gingelly - medicinal plants: <i>Rauwolfia</i> , Sathavari, Goggul, Basil and <i>Saraca</i>	14

Programme code	M.Sc.	Programme Title : Master of Science in Botany		
Course Code:	21PBY1E3	Title : Elective -1 Seed technology	Batch	2021 – 23
Hrs/Week:	5		Semester	I
			Credits	4

Course Objective

The main objective of this course is:

- To refresh the basic knowledge of seed development and structures and apprise students with its relevance to production of quality seed.

Course Outcomes (CO)

On the successful completion of the course, student will be able to:		
CO1	Express knowledge gained on the principles of seed technology	K1
CO2	Understand biological bases of technologies used in modern seed science and technology.	K2
CO3	Apply knowledge on the seed multiplication and certification.	K3
CO4	Gaining knowledge on principles of seed processing, Seed drying and methods.	K2
CO5	Get aware on biological and technological aspects of seed production.	K5
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 – Evaluate		

Unit	Content	Hrs
Unit I	Type of seeds, Classification of seeds, Recalcitrant seeds, Dicot and monocot seeds - Morphology and types, Seed reserves. External and internal structures of seed and their functional significance, Albuminous and Ex-Albuminous seeds	14
Unit II	Types of dormancy - physical, Physiological, Morphological, Chemical and mechanical, Primary and secondary dormancy, Photo and Skoto dormancy. Methods to overcome dormancy. Ecological significance of seed dormancy	15
Unit III	Seed maturation and germination - metabolism during germination. Epigeal and Hypogeal germination, Germination mechanism. Brief account of Germination value, Germination rate, Germination percentage. Germination ecology: Environmental factors and germination behaviour.	14
Unit IV	Seed production in self and cross pollinated plants, Classes of seeds-traditional, breeder, foundation and certified seeds. Viability tests- their significance and importance. Seed harvesting, processing, treatments, testing and seed sampling, viability and vigour. Critical role of seed moisture content and environmental factors on viability. Viability period of Indian forestry Species.	15
Unit V	Effect of storage on seed longevity, Seed germplasm and storage in different conditions. Cryopreservation, Static conservation of seeds. Seed borne pathogens and pests - seed treatments. Seed certification, Standard inspection, registration and seed law enforcement. Clonal seed orchards, seed banks.	14

Programme code	M.Sc.	Programme Title : Master of Science in Botany		
Course Code: 21PBY205		Title: Core – 5 Plant Anatomy and Reproductive Biology	Batch	2021 – 23
			Semester	II
Hrs/Week:	6		Credits	4

Course Objectives

The main objectives of this course are to:

- Understand the mechanism underlying the shift from vegetative to reproductive phase.
- Trace the development of male and female gametophyte.
- Highlight the physiological role of endosperm in the morphogenesis of embryo.
- Classify meristems and identify their structures, functions and roles in monocot and dicot plants growth and secondary growth of woody plants.

Course Outcomes (CO)

On the successful completion of the course, student will be able to:		
CO1	Recall and remember the relationship between Plant anatomy and Embryology	K1
CO2	Understand the vascular system, cellular development and reproduction in various plant system of angiosperm	K2
CO3	Learn the structures, functions and roles of meristems, pre and post fertilizational change and embryological tissues in angiospermic plants	K2, K4
CO4	Apply the idea on study of plant anatomical structures and reproduction in plants growth and development for attaining green cover.	K3
CO5	Get aware of applied aspects and techniques for making profitable cultivation in agriculture.	K4
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 – Evaluate		

Unit	Content	Hrs
Unit I	Anatomy: General account and theories of organization of shoot apex and root apex – quiescent centre and modern concept on meristems – structural diversity, functional complexity and phylogenetic trends in specialization of complex permanent tissues (xylem and phloem) - cambium – origin – structure, storied and non-storied types – formation of cork cambium, and periderm - <i>*Anomalous secondary growth in dicot and monocot.</i>	15
Unit II	Vascular differentiation in primary and secondary structure of root and stem in dicot and monocot – origin of lateral roots – root stem transition – anatomy of dicot and monocot leaves - stomatal types – nodal anatomy – petiole anatomy – trichomes – glands – secretory tissues – nectaries – laticifers and their significance.	14
Unit III	Reproductive Biology: Microsporangium - microsporogenesis - microspores - arrangement - morphology - ultra structure - microgametogenesis - pollen – stigma- Interaction - incompatibility –types mechanism and methods to overcome incompatibility – palynology .	14
Unit IV	Classification, structure and development of megasporangium, megasporogenesis, female gametophyte - types, ultra structure, and haustorial behavior - nutrition of embryo sac - double fertilization and triple fusion - endosperm - types and functions of endosperm- <i>*Embryogeny: classification, development of monocot (grass) and dicot (crucifer) embryos.</i>	15

Unit V	Polyembryony- types - classification - causes - induction and practical application- apomixis and its significance - seed and fruit development and role of growth substances - parthenocarpy and its importance.	14
---------------	---	-----------

Course Code: 21PBY206		Title: Core – 6 Plant Physiology	Batch	2021 – 23
			Semester	II
Hrs/Week:	6		Credits	4

Course Objectives

The main objectives of this course are to:

- Learn physiological mechanisms underlying plant metabolism.
- Be familiar with the phytohormones and its metabolism in plants generating plant growth.
- Study about the movements in plants.
- Know the various responses of plants against stress and its mechanism of resistance.

Course Outcomes (CO)

On the successful completion of the course, student will be able to:			
CO1	Remember the basic metabolism in plants		K1
CO2	Deduce the biological pathways		K2
CO3	Execute the molecular based modification of metabolism in plants		K3
CO4	Able to identify the plant stress based on its responses and anti-oxidative defense.		K4
CO5	Validate the plant physiological scientific hypothesis by using various experiments		K5
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate			

Unit	Content	Hrs
Unit I	Plant- water relations: imbibitions, diffusion and osmosis - water potential and chemical potential - absorption of water - water transport through xylem - transpiration and its significance - <i>*factors affecting transpiration - physiology of stomatal movement</i> - transport of photosynthate - the mechanism of translocation in the phloem, assimilate partitioning.	14
Unit II	Signal transduction: overview - receptors and G-proteins - jasmonic acid signaling – Calcium and protein signalling. Mineral nutrition: Criteria of essentiality of elements; macro and micro- nutrients; role of essential elements; mineral deficiency symptoms and plant disorders - nutrient uptake and transport mechanism - role of cell membrane, ion pump carrier.	15
Unit III	Photosynthesis: Historical background and significance - photosynthetic pigments - accessory pigments and photoprotective carotenoids - reaction center complexes - photochemical reactions - electron transport pathways in chloroplast membrane - photo phosphorylations - C3 cycle, photorespiration and C4 cycle - crassulacean acid metabolism.	14
Unit IV	Respiration: Glycolysis - TCA cycle and its regulation - aerobic and anaerobic respiration - electron transport in mitochondria - redox potential - oxidative phosphorylations - pentose phosphate pathway. nitrogen metabolism: importance of nitrogen to plants - nitrogen cycle -biological nitrogen fixation - <i>nif</i> gene - nitrate assimilation GDH and GS/GOGAT pathway - biosynthesis of nitrogen, Carbohydrate and amino acids- radical scavenging activity	14

Unit V	Growth and development: Kinetics of growth - seed dormancy - seed germination and influencing factors of their regulation - the concept of photoperiodism - physiology of flowering - florigen concept - vernalization - biological clocks - physiology of senescence - fruit ripening. Plant hormones - auxins, gibberellins, cytokinins, abscisic acid ethylene, history of their discovery - biosynthesis - role and mechanism of action. Photomorphogenesis: phytochromes and cytochromes, their discovery - physiological role and mechanism of action - *Stress physiology: Plant responses to biotic and abiotic stress, mechanism of biotic and abiotic stress tolerance.	15

Programme code	M.Sc.	Programme Title: Master of Science in Botany		
Course Code: 21PBY207		Title : Core – 7 Cytology, Genetics and Plant Breeding	Batch	2021 – 23
Hrs/Week: 5			Semester	II
			Credits	4

Course Objectives

The main objectives of this course are to:

- Enable to learn various cell structures and functions of prokaryotes and eukaryotes and understand the salient features and functions of cellular organelles.
- To study the fundamental principles of Genetics and understand the structure, function and changes in the genetic materials.
- To learn the principles of Plant Breeding and the application of molecular techniques in crop improvement.

Course Outcomes (CO)

On the successful completion of the course, student will be able to:		
CO1	Remember the general features and organization of Ultra structure of cell wall and cell organelles in prokaryotes and eukaryotes	K1
CO2	Understand the structure and function of cell organelles in prokaryotes and eukaryotes	K2
CO3	Gain knowledge on chromosome structure and cell cycle process	K3
CO4	Gain knowledge on various types of genes and mutation	K3
CO5	Learn the different principles of plant breeding and the application of molecular marker techniques in crop improvement	K4
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 – Evaluate		

Unit	Content	Hrs
Unit I	Cytology: Cell structure- organization of prokaryotic and eukaryotic cell - Cell wall - nucleus- mitochondria - Golgi bodies - lysosomes- endoplasmic reticulum- peroxisomes- plastids - vacuoles - structure and function of cytoskeleton - Chromosome: Structure and types - overview of mitosis and meiosis - regulations of cell cycle.	14
Unit II	Genetics: Mendelian and non Mendelian inheritance - interaction of genes, complementary genes, epistasis, multiple factor inheritance - Sex- linked inheritance - theories of sex determination - sex determination in plants - linkage and crossing over - kinds of linkage – significance - types of crossing over mechanism- models for homologous recombination - Construction of genetic map - two point test cross- three point test cross- cytoplasmic male sterility in plants	16
Unit III	Classification of mutations - spontaneous and induced mutations – physical and chemical mutagens - molecular basis of gene mutation - chromosomal aberrations - epigenetics - genetic code - DNA as a genetic material. - gene regulatory mechanisms (prokaryotes & eukaryotes)	13
Unit IV	Plant Breeding: Introduction to breeding of cultivated plants - objectives of breeding - polyploidy and haploids in plant breeding –double haploid-Selection – mass selection - pureline selection - clonal selection merits and demerits - <i>*Improvement of crop plants by pedigree method, bulk method, backcross method</i>	14

Unit V	Intervarietal, interspecific and intergeneric hybridization - heterosis - hybrid vigour - marker assisted breeding - <i>*national and international organizations for crop improvement</i> - protection of plant varieties & farmers rights Act, India - Dus - Germplasm - The role of IBPGR and NBPGR -germplasm conservation (Rice and Sugarcane).	15

Programme code	M.Sc.	Programme Title: Master of Science in Botany		
Course Code: 21PBY208		Title : Core – 8 Laboratory course – II (Plant Anatomy and Reproductive Biology, Plant Physiology, Cytology, Genetics and Plant Breeding)	Batch	2021 – 23
Hrs/Week:	6		Semester	II
			Credits	4

Course Objectives

The main objectives of this course are to:

- Get knowledge on plant and water relations, chromatographic techniques and *in vitro* antioxidants quantification.
- Gain knowledge on various plant anatomical features through free hand sections, microtome sections and maceration method.
- Get adequate knowledge in internal structure of anther, pollen types and germination behaviors, L.S. of ovule, types of endosperms and dicot embryo dissection.
- Observe the different stages of mitosis and chromosome behaviour and organization during various stages and to learn staining techniques of various plant tissues.
- Understand the principles of genetics and plant breeding to apply crop improvement programmes.

Course Outcomes (CO)

On the successful completion of the course, student will be able to:		
CO1	Recall or remember the various aspects of plant physiology, embryology, plant tissue culture, anatomy and cytology	K1
CO2	Understand and apply various concepts of plant physiology, embryology, anatomy and cytology.	K3
CO3	Analyze the theory knowledge gained from Plant Anatomy and Reproductive Biology, Plant Physiology, Cytology into practical mode in order to acquire applied knowledge by hands-on experiences.	K4
CO4	Analyze or interpret the results achieved in practical session in the context of existing theory and knowledge	K4
CO5	Evaluate the theory and practical skills gained during the course to make any new product	K5
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate		

Part	Content	Hrs
Part 1	Anatomy 1. Staining of various plant tissues 2. Primary structure of dicot and monocot stem (<i>Tridaxprocumbens</i> , <i>Zea mays</i>) 3. Normal secondary thickening of dicot stem 4. Anomalous secondary thickening Multiple and successive cambial rings – <i>Boerhaavia</i> Included or interxylary phloem – <i>Achyranthes</i> Intraxylary phloem/Ridged xylem – <i>Bignonia</i> Inverted cortical bundles – <i>Nyctanthes</i> 5. Secondary growth in monocot stem – <i>Dracaena</i>	45

	6. Study of stomatal types in plant leaves 7. T.S of dicot leaf – Dorsiventral & isobilateral (<i>Nerium</i>) 8. T. S. of monocot leaf – Bamboo 9. Maceration of plant tissues 10. Microtomy – Demo 11. Slide submission (Permanent slide submission) Reproductive Biology 12. Study of pollen morphology 13. Study of pollen germination 14. Test for pollen viability 15. Types of ovules 16. Dissection of mature embryo sac 17. Observation of endosperm types 18. Dissection of embryos – dicot, monocot and polyembryony	
Part 2	Plant Physiology 1. Determination of DPD of plant tissues by plasmolytic method 2. Extraction and estimation of chlorophyll. 3. Separation of plant pigments by Thin Layer Chromatography. 4. Determination of stomatal frequency and stomatal index. 5. Measurement of respiration by simple respiroscope. 6. Hill reaction by isolated chloroplasts (demonstration). 7. Estimation of Nitrate reductase activity. 8. Determination of Total Antioxidant activity by phosphomolybdenum reduction method. 9. Determination of Superoxide radical scavenging activity	30
Part3	Cytology, Genetics And Plant Breeding 1. Preparation of slide for Mitotic study from <i>Allium cepa</i> root tips 2. Preparation of slide for meiotic study from flower bud 3. Problems in Mendelian and non – Mendelian inheritance 4. Problems in Mutation 5. Charts on plant breeding techniques	15

Programme code	M.Sc.	Programme Title : Master of Science in Botany		
Course Code: 21PBY2E4		Title : Elective -2 Horticulture and Landscaping	Batch	2021- 23
			Semester	II
Hrs/Week:	5		Credits	4

Course Objectives

The main objectives of this course are to:

- Know about the brief history, divisions, classification and structure of horticultural plants.
- Understand the plant growth environment in relation to soil, nutrients, fertilizers, and bio inoculants.
- Study the sexual and vegetative propagation methods including propagation through specialized vegetative structures.
- Highlight the aesthetics of horticulture and postharvest handling of horticultural products.

Course Outcomes (CO)

On the successful completion of the course, student will be able to:		
CO1	Understand about the importance of horticulture	K2
CO2	Apply knowledge on soil, climate and reclamation of soil	K3
CO3	Apply and analyze knowledge on crop establishment activities	K3,K4
CO4	Analyze plant growth structures in horticulture	K4
CO5	Understand about the importance of bio-organic fertilizers and crop establishment methods	K2,K5
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate		

Unit	Content	Hrs
Unit I	Brief history - scope and importance - divisions of horticulture - Classification of horticultural plants - Plant growth environment: biotic and abiotic factors - primary and secondary nutrients and their functions	15
Unit II	Organic matter; fertilizers - organic, inorganic and potting media; bio-inoculants; methods of fertilizer application; irrigation types- sprinkler irrigation, trickle irrigation- surface, furrow, surge, pitcher. directing plant growth - pruning and thinning.	14
Unit III	Plant propagation: Seeds - advantages, viability, mechanism of dormancy and dormancy breaking methods - direct and indirect seedling production in nurseries and transplantation - medicinal plant cultivation - adaptive cultivation.	14
Unit IV	Propagation through specialized underground structures - corm, tuber, sucker, bulb, bulbil, rhizome; vegetative propagation - cutting, layering, grafting and budding. Soil- less production of horticultural crops - hydroponics, sand culture, gravel culture, terrace garden, rockery, vertical gardening.	14
Unit V	Esthetics of horticulture - design; elements and principles of design; flower arrangement - cut flowers - Significance of cut flower industry in India; terrarium culture; bonsai; growing plants indoors; turf production- landscaping . Post-harvest handling of Horticultural products - harvesting;	15

	*storage; processing - pomology - cultivation of apple and pineapple. Commercial floriculture – cultivation of jasmine and rose. Commercial horticulture - extraction of Jasmine concrete and papain- fruit and vegetable carving techniques.

Programme code	M.Sc.	Programme Title : Master of Science in Botany		
Course Code: 21PBY2E5		Title : Elective – 2 IPR and Bioethics	Batch	2021 – 23
			Semester	II
Hrs/Week:	5		Credits	4

Course Objective

The main objectives of this course are to:

- Cater to the needs of the stakeholders of knowledge economy is designed for those interested in Managers and the like.
- Create awareness about current trends in IPR and Innovation
- Disseminate knowledge on patents, patent regime in India and abroad and registration aspects
- Pursue a career in IPR, which opens opportunities in the fields of IP Attorneys and IP Consultants

Course Outcomes (CO)

On the successful completion of the course, student will be able to:		
CO1	Remember the basic knowledge of IPR	K1
CO2	Understand the types of applications of IPR	K2
CO3	Apply the knowledge on patenting of the product	K3
CO4	Gain an insight into the biosafety and farmers rights	K4
CO5	Acquire knowledge on Protection of Plant Varieties and Farmers' Rights Act	K4
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate		

Unit	Content	Hrs
Unit I	Introduction to intellectual property right (IPR) - Concept and kinds. Economic importance. IPR in India and world: Genesis and scope, some important examples. IPR and WTO (TRIPS, WIPO). Patent -Objectives, Rights, Patent Act 1970 and its amendments. Procedure of obtaining patents, Working of patents. Infringement.	14
Unit II	Copyrights -Introduction, Works protected under copyright law, Rights, Transfer of Copyright, Infringement. Trademarks- Objectives, Types, Rights, Protection of goodwill, Infringement, Passing off, Defences, Domain name.	14
Unit III	Geographical Indications -Objectives, Justification, International Position, Multilateral Treaties, National Level, Indian Position. Industrial Designs Objectives, Rights, Assignments, Infringements, Defences of Design Infringement	14
Unit IV	Protection of Traditional Knowledge - Objective, Concept of Traditional Knowledge, Holders, Issues concerning, Bio-Prospecting and Bio-Piracy, Alternative ways, Traditional Knowledge on the International Arena, at WTO, at National level, Traditional Knowledge Digital Library.	15
Unit V	Protection of Plant Varieties - Plant Varieties Protection-Objectives, Justification, International Position, Plant varieties protection in India- Rights of farmers, Breeders and Researchers - National gene bank, Benefit sharing- Protection of Plant Varieties and Farmers' Rights Act, 2001.	15

Course Code: 21PBY2E6		Title : Elective-2 Organic farming	Batch	2021 – 23
Hrs/Week: 5			Semester	II
			Credits	4

Course Objectives

The main objectives of this course are to:

- Know the about the organic farming and its practice for sustainable agriculture.
- Know the about the marketing and export potential of organic farming products

Course Outcomes (CO)

On the successful completion of the course, student will be able to:		
CO1	Remembering the importance and practice of organic farming	K1
CO2	Will get an idea on organic farming and eventual characterization	K2
CO3	Apply economic values of organic way for holistic development	K3
CO4	Review the various stages of organic farming to make eco-friendly agriculture	K4
CO5	Understand and learn the organic farming multidimensional improvement of society	K2 &K4
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 – Evaluate		

Unit	Content	Hrs
Unit I	Organic farming – concept and definition, its relevance to India and global agriculture and future prospects; land and water management – land use, minimum tillage; shelter zones, hedges, pasture management, agro-forestry.	14
Unit II	Organic farming and water use efficiency; soil fertility, nutrient recycling, organic residues, organic manures, composting, soil biota and decomposition of organic residues, earthworms and vermicompost, green manures and biofertilizers.	14
Unit III	Farming systems, crop rotations, multiple and relay cropping systems, intercropping in relation to maintenance of soil productivity.	13
Unit IV	Weeds – introduction to weeds -definition- common weeds on crop fields – Types of weed Control- Biological weed control, plant diseases and insect pest management, biological agents and pheromones, biopesticides.	16
Unit V	Socio-economic impacts; marketing and export potential: inspection, certification, labeling and accreditation procedures; organic farming and national economy.	15

Unit II	Organic matter; fertilizers - organic, inorganic and potting media; bioinoculants; methods of fertilizer application; irrigation types- sprinkler irrigation, trickle irrigation- surface, furrow, surge, pitcher. directing plant growth - pruning and thinning.	6
Unit III	Direct and indirect seedling production in nurseries and transplantation - medicinal plant cultivation - adaptive cultivation. Propagation through specialized underground structures - corm, tuber, sucker, bulb, bulbil, rhizome;	5
Unit IV	Vegetative propagation - cutting, layering, grafting and budding. Soil-less production of horticultural crops - hydroponics, sand culture, gravel culture, terrace garden, rockery, vertical gardening.	5
Unit V	Esthetics of horticulture - flower arrangement - cut flowers - Significance of cut flower industry in India; terrarium culture; bonsai; growing plants indoors; - pomology - cultivation of apple and pineapple. Commercial floriculture – cultivation of jasmine and rose. Commercial horticulture - extraction of Jasmine concrete and papain-fruit and vegetable carving techniques.	8

Programme code	M.Sc.	Programme Title : Master of Science in Botany		
Course Code:21PBY309		Title : Core - 9 Taxonomy of Angiosperms	Batch	2021– 23
Hrs/Week: 6			Semester	III
			Credits	4

Course Objectives

The main objectives of this course are:

- To know about the basic concepts and principles of plant systematics.
- To establish a suitable method for correct identification and adequate characterization of plants.
- To be aware of the importance of taxonomic relationships in plant systematic studies.
- To enable knowledge on various classification systems

Course Outcomes (CO)

On the successful completion of the course, student will be able to:		
CO1	Remember the basic principles of systematics, including identification, nomenclature, classification, and the inference of evolutionary patterns from data.	K1
CO2	understand of evolutionary processes and patterns in the major plant groups	K2
CO3	Apply scientific terminology accurately through effective oral and written communication and the use of dichotomous keys in a regional floristic manual.	K3
CO4	Analyze and ability to handle plant materials in the laboratory and herbarium and in the field.	K4
CO5	Evaluate the medicinal and economic importance of plants.	K5
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate		

Unit	Content	Hrs
Unit I	History of classification – detailed study of Bentham & Hooker, Engler&Prantl and Hutchinson – merits and demerits of the systems – ICBN –typification, principles of priority, effective and valid publication, citation, and retention - APG I, II,III & IV systems of classification.	13
Unit II	Biosystematics – aim and scope –biosystematic categories – phenotypic plasticity – Herbarium technique, <i>*major herbaria in India and World,floras, *monograph and revision.</i> Modern trends in taxonomy: Anatomical, embryological, cytological, chemical characters and their use in taxonomy.	13
Unit III	Vegetative, floral characters and economic importance of the following families: Polypetalae: Magnoliaceae, Portulacaceae, Caryophyllaceae, Zygophyllaceae, Oxalidaceae, Tiliaceae, Aizoaceae, Lythraceae, Rhamnaceae, Sapindaceae and Combretaceae.	15
Unit IV	Gamopetalae: Oleaceae, Plumbaginaceae, Verbenaceae, Gentianaceae, Boraginaceae, Pedaliaceae and Bignoniaceae. Monochlamydeae: Moraceae, Loranthaceae, Nyctaginaceae and Chenopodiaceae. Monocots: Commelinaceae, Liliaceae, Orchidaceae, Poaceae and Cyperaceae.	16

Unit V	Molecular taxonomy and its applications – DNA Fingerprinting and barcoding in plants – numerical taxonomy. Computer aided taxonomy – taxonomy softwares– DELTA, GRIN, IPNI. Biodiversity portal. GIS in taxonomy- software’s and mobile apps for plant identification	15

Programme code	M.Sc.	Programme Title : Master of Science in Botany		
Course Code: 21PBY310	6	Title: Core - 10 Plant Biochemistry and Biophysics	Batch	2021–23
Hrs/Week:			Semester	III
	Credits		4	

Course Objective

The main objectives of this course are to:

- Emphasize functions of plants biomolecules and their metabolism.
- Learn structural and functional properties of carbohydrates, proteins and lipids.
- Study about the mechanism of enzyme action and inhibition.
- Provide specific knowledge of compounds and biochemical pathways that occur in plants.

Course Outcomes (CO)

On the successful completion of the course, student will be able to:		
CO1	Remember the fundamentals of biochemistry	K1
CO2	Get an idea on Biochemical pathways and its significance	K2
CO3	Learn the structure and functions of carbohydrates, Lipids, Proteins	K3
CO4	Analyze and apply the biomolecular techniques	K4
CO5	Execute the biophysical laws	K4
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate		

Unit	Content	Hrs
Unit I	Basic principles: Structure of atoms, molecules and chemical bonds- ionic bond - covalent bond - Vander Vaal's forces- hydrogen bonding and hydrophobic interactions - pH - pH scale - Henderson-Hasselbalch equation - buffers - definition- <i>*biological role of buffer system.</i>	13
Unit II	Carbohydrates: Introduction - metabolism - gluconeogenesis, glycogenolysis and glycogenesis - classification and properties of amino acids - biosynthesis and degradation of amino acids- structure, classification and properties of Protein - structure-lipids: classification, structure and properties - biosynthesis and oxidation of fatty acids - plant waxes, cholesterol and lecithin.	14
Unit III	Secondary metabolites: classification, functions and biosynthesis of alkaloids, phenols, terpenoids and flavonoids - plant pigments - structure, classification and functions of chlorophyll, anthocyanins, carotenoids and antho-xanthins	15
Unit IV	Enzymes: Nomenclature, classification and properties - mechanism of enzyme action (Lock and key & induced fit model) and factors affecting enzyme activity (substrate, pH and temperature) - Michaelis - Menton kinetics - enzyme inhibition and its types - enzyme utilization in industry - enzymes - <i>*enzymes applications in medicine.</i>	16
Unit V	Biophysics: Energy flow - laws of thermodynamics - concept of free energy - energy transfer and redox potential - radio labeling techniques - properties of different types of radioisotopes normally used in biology,	14

	their detection and measurement - incorporation of radioisotopes in biological tissues and cells - molecular imaging of radioactive material safety guidelines

Course Code: 21PBY311		Title: Core – 11 Plant Biotechnology and Nanobiology	Batch	2021– 23
Hrs/Week: 5			Semester	III
			Credits	4

Course Objectives

The main objectives of this course are to:

- Know about the Genome organization in plants
- Understand the Principles and culture techniques of cells, callus, organs, pollen, anthers, embryos, and protoplasts
- Know the applications of nanoparticles

Course Outcomes (CO)

On the successful completion of the course, student will be able to:		
CO1	Students will keep in mind the knowledge on techniques in plant tissue culture	K1
CO2	Understand the fundamentals of DNA Replication and central dogma of life	K2
CO3	Execute knowledge on molecular achievements in environmental stress management in plants	K3
CO4	Apply the basic concepts of Nanotechnology to synthesis the nanoparticles from plants	K3
CO5	Analyze the important of nanoparticles in Environment	K4
K1 – Remember; K2 – Understand; K3 – Apply; K4 – Analyze; K5 – Evaluate		

Unit	Content	Hrs
Unit I	Essential Plant biology concepts for plant biotechnology: Genome organization- mitochondrial genome organization- chloroplast genome organization- nuclear genome organization.-protein targeting- protein targeting to nuclear, mitochondria and chloroplast –molecular markers in plants.	14
Unit II	DNA Replication (Eukaryotic and prokaryotic) – semi conservative mode of DNA replication –protein synthesis – PCR – DNA sequencing methods (Sanger and Maxam and Gilbert)	14
Unit III	Plant Tissue Culture: History, Laboratory organization, sterilization methods – media preparation –micropropagation– meristem culture – callus culture – suspension culture- organogenesis – somatic embryogenesis – artificial seed preparation- cryopreservation. Haploid production – protoplast isolation and culture- somatic hybridization –cybrids–somoclonal variation.	14
Unit IV	Development of plant transformation cassettes – Structure and function of Ti plasmid of <i>Agrobacterium</i> – mechanism of T-DNA transfer to plants – Ti plasmid vectors for plant transformation – promoter and marker genes in plant transformation - <i>*physical , chemical and biological method for plant gene transfer</i> – transgenic plants for viral resistance – herbicide tolerance – delay of fruit ripening – resistance to insects, pests and pathogens – ethics in plant biotechnology – IPR	15
Unit V	Types of nanomaterials: nano rods, nanowires, nanoparticles, nanocapsules, nano membranes, nanomesh, nanofibres, nano catalysts, and carbon nano tubes – silver nano-particle synthesis– methods of preparation of nanomaterial: top	

	down and bottom up approaches- emulsifiers, homogenizers, MOCVD etc. Environmental applications: Nano clays, nano adsorbents, zeolites, release of nutrients and pesticides, biosensors – green technologies - <i>*treatment of industrial waste waters using nano-particles.</i>	15

Course Code:21PBY312		Title : Core – 12 Laboratory course – III Taxonomy of Angiosperms	Batch	2021- 23
			Semester	III
Hrs/Week:	3		Credits	4

Course Objectives

The main objectives of this course are to:

- Understand and develop skill sets in plant morphological, floral characteristics and artificial key preparation
- Expedite skilled workers to carry out research in frontier areas of plant sciences

Course Outcomes (CO)

On the successful completion of the course, student will be able to:		
CO1	Identify salient features of families	K3
CO2	Understand about different floral characteristics and artificial key preparation which employed for plant identification and conservation	K4, K5
CO3	Apply techniques to conserve importance of forests	K3
CO4	Develop a skill sets to work with plant systematic field	K3
CO5	Evaluate the economic importance of plants.	K5
K1 – Remember; K2 – Understand; K3 – Apply; K4 – Analyze; K5 – Evaluate		

Part	Content	Hrs
Part 1	Taxonomy of Angiosperms <ol style="list-style-type: none"> 1. Terminologies related to taxonomy. 2. Identification of taxonomic features from plant parts 3. Desection of flower parts 4. Identification and description of families belongs to Polypetalae (Magnoliaceae, Portulacaceae, Caryophyllaceae, Zygophyllaceae, Oxalidaceae, Tiliaceae, Aizoaceae, Lythraceae, Rhamnaceae, Sapindaceae and Combretaceae) 5. Identification and description of families belongs to Gamopetalae (Oleaceae, Plumbaginaceae, Verbenaceae, Gentianaceae, Boraginaceae, Pedaliaceae and Bignoniaceae). 6. Identification and description of families belongs to Monochlamydeae (Moraceae, Loranthaceae, Nyctaginaceae and Chenopodiaceae) 7. Identification and description of families for Monocots (Commelinaceae, Liliaceae, Orchidaceae, Aroideae, Cyperaceae and Poaceae) 	45

Part 2	<ol style="list-style-type: none"> 1. Preparation of artificial keys at family, generic and species level by locating key characters. 2. Field identification of plants 3. Economic importance of all the families given in the theory 4. Herbarium techniques 5. Preparation of herbarium sheets — 50 minimum. 6. Identification of plants using software's and mobile apps. 7. Botanical tour to any vegetation rich places.

Hrs/Week: 3			Semester	III
			Credits	4

Course Objectives

The main objectives of this course are to:

- Understand the basic principle and methodology in biochemistry experiments
- Expose the students to gain recent advances in molecular biology and plant biotechnology

Course Outcomes (CO)

On the successful completion of the course, student will be able to:		
CO1	Analyze the plants for its biochemical components	K4
CO2	Develop a skill sets to work with biochemistry, molecular biology	K3,
CO3	Apply the various techniques to produce disease free plants	K3
CO4	Analyze the conditions that are suitable for direct and indirect plant regeneration	K4
CO5	Asses the nanoparticles synthesis from plants	K5
K1 – Remember; K2 – Understand; K3 – Apply; K4 – Analyze; K5 – Evaluate		

Part	Content	Hours
Part 1	Plant Biochemistry: 1. Estimation of Carbohydrates (Anthrone method) 2. Estimation of Proteins (Lowry & Bradford). 3. Quantification of total free amino acids. 4. Estimation of free fatty acids. 5. Estimation of total phenolics (Folin-Ciocalteu reagent method). 6. Estimation of flavonoids by colorimetric method 7. Plant extraction by soxhelt apparatus. 8. Phytochemical screening of plant extrac 9. Separation of proteins by Sodium Dodecyl Sulfate PolyacrylamideGelectrophoresis (SDS-PAGE). 10. Determination of enzyme activities — catalase, ascorbic acid oxidase and polyphenoloxidase.	45
Part 2	Biology and Plant Biotechnology 1. DNA Replication, protein targeting, structure of m – RNA charts 2. Isolation of plasmid DNA from bacteria 3. Isolation of genomic DNA from plants 4. Estimation of RNA by orcinol method 5. Amplification of a plant gene using PCR 6. Synthesis of silver nano particles from plant extracts 7. Preparation of MS Medium 8. Shoot tip culture for plant regeneration 9. Induction of Callus from leaf	

	10. Production of shoot and root from callus 11. Production of somatic embryo from leaf 12. Anther culture for haploid plant production 13. Preparation of synthetic seeds 14. Hardening for <i>in-vitro</i> produced plantlet

Programme code	M.Sc.	Programme Title : Master of Science in Botany		
Course Code: 21PBY3E7		Title: Elective -3 Forestry and Wood science	Batch	2021- 23
			Semester	III
Hrs/Week:	5		Credits	4

Course Objectives

The main objectives of this course are to:

- Understand the importance of forests.
- Enable them to contribute meaningfully in the conservation of the forest.
- Make students aware of the current global problems in forestry related to human intervention and the need of developing a sustainable way of life.
- Provide a platform to appreciate biodiversity and the importance of conservation strategies

Course outcomes (CO)

On the successful completion of the course, student will be able to:		
CO1	Recollect the importance of forests and wood science on every aspects	K1
CO2	Understand the unique features of forests types and to impart conservation strategy	K2
CO3	Apply the forest units in the manufacturing of value added products	K3
CO4	Review the laws for the protection of forest and its resources	K4
CO5	Analyze the physical, chemical and mechanical properties of commercial wood	K4
K1 – Remember; K2 – Understand; K3 – Apply; K4 – Analyze; K5 – Evaluate		

Unit	Content	Hrs
Unit I	General introduction to forests – natural and manmade; tropical, temperate, evergreen, semi evergreen, deciduous; Monoculture, multipurpose, social and industrial – forest and gene conservation; <i>*forest types in south India with special emphasis to TamilNadu</i> . IUCN red listed categories.	14
Unit II	Silviculture– regeneration of forests – clear felling, uniform shelter wood selection, coppice and conservation systems –silviculture of some of the economically important species <i>Azadirachta indica, Tectona grandis, Eucalyptus, Mahogany (Swietenia mahagoni), Dalbergia sissoo, Santalum album, Madhuca longifolia, Rubber (Hevea brasiliensis), Sal (Shorea robusta), Iron wood (Mesua ferrea) and Padauk (Pterocarpus sp.)</i> . Barks – Nature and types.	15
Unit III	Social and agro forestry: Selection of species and role of multipurpose trees. Food, fodder and energy – avenue plantation – sacred groves – definition, status and importance –Forest laws- necessity, General principles, Indian forest act 1927 and their amendment—biological diversity act (2002 in force) - World Conservation Strategy (WCS) and National Biodiversity Strategy and Action Plan (NBSAP).	13
Unit IV	Ethnobotany– definition – sub divisions – methodology – major tribes in Southern India – regional studies –ethnobotany in human welfare – food – medicine – importance of ethnobotany in Indian context – role of tribes in medicinal plants conservation – <i>role of NMPB, AYUSH in medicinal plant conservation*</i> - <i>Medicinal Plant Conservation</i> Area (MPCA) sites.	14
Unit V	Nature and properties of wood: physical, chemical, mechanical and anatomy of wood. Durability of wood- wood seasoning and preservation; Defects and abnormalities of wood; types of commercial wood species of India. Wood deterioration- fungi, insects and other agents; Wood protection Practical methods	16

	for preserving and protection, Chemical processing of wood- Composite wood: adhesives-manufacture, properties and uses- manufacture and uses of plywood, fiber boards and particle boards. Present status of composite wood, paper and rayon industries. Present position of supply of raw materials to industries and wood substitution.

Programme code	M.Sc.	Programme Title : Master of Science in Botany		
Course Code: 21PBY3E8		Title: Elective – 3 Herbal Technology	Batch	2021 – 23
Hrs/Week: 5			Semester	III
			Credits	4

Course Objectives

The main objectives of this course are to:

- Understand the concept, the life style and traditional practices of plants.
- Assess the various investigation methods to collect ethnobotanical knowledge of tribals.
- Apply methods to transform ethnobotanical knowledge into value added products.

Course outcomes (CO)

On the successful completion of the course, student will be able to:		
CO1	Recollect the importance of herbal technology and traditional system of medicine	K1
CO2	Understand various plant based drugs from ayurvedha, unani, homeopathy, siddha etc.	K2
CO3	Apply the knowledge to medicinal plant cultivation for sustainable supply	K3
CO4	Analyze the various steps in manufacturing of plant based drugs.	K4
CO5	Assess the methods to transform ethnobotanical knowledge into value added products.	K5
K1 – Remember; K2 – Understand; K3 – Apply; K4 – Analyze; K5 – Evaluate		

Unit	Content	Hrs
Unit I	History, definitions and scope of herbals – traditional medicinal systems: ayurvedha, unani, homeopathy, siddha, naturopathy and yoga. Definition of drug – classification of natural drugs, (alphabetical, morphological, pharmacological, chemical and chemo taxonomical).	14
Unit II	Cultivation and collection of natural drugs – Detailed study of the following medicinal plants: <i>Plantago 56hone</i> , <i>Hypericum perforatum</i> , <i>Digitalis purpurea</i> , <i>Terminalia chebula</i> , <i>Saraca indica</i> , <i>Olea europoea</i> , <i>Strychnos nux –vomica</i> , <i>Withania somnifera</i> and <i>Coleus forskohlii</i> -women entrepreneurship development – marketing cultivated medicinal plants – National Medicinal Plants Board of India.	16
Unit III	General methods of phytochemical and biological screening – Natural sources – Extraction – Purification and isolation of plant constituents – Alkaloids – glycosides – Volatile oils – Study of some herbal formulation techniques as drug cosmetics.	14
Unit IV	Ethnobotany – definition – traditional and folklore medicines – native medicine – major tribes of south india and their ethnobotanical and ethnobiological heritage – ethno medicines –ethnobotany and conservation of plants with special reference to india	14
Unit V	Mythology and conservation of ecosystems – conservation of selected plant species: sacred groves, forestry and unique ecosystems and their	

	ethnobiological values, plants and animals In art, tradition and ethnography: ethnobotanical field methods.	14

Course Code: 21PBY3E9		Title: Elective-3 Pharmacognosy	Batch	2021 – 23
Hrs/Week: 5			Semester	III
			Credits	4

Course Objectives

The main objectives of this course are to:

- Enrich knowledge on some important medicinal plants and their usage.
- Afford information on extraction, separation, identification and evaluation techniques of plant derived drugs.
- Provide the scientific temper to find a suitable job in relevant industries or to become a potential entrepreneur by using medicinal plants in efficient commercialization way.

Course outcomes (CO)

On the successful completion of the course, student will be able to:		
CO1	Recall the knowledge about modern concept and scope of Pharmacognosy.	K1
CO2	Identify their professional role in the healthcare system	K2
CO3	Design methods of standardization for herbal drug or formulations	K3
CO4	Analyze herbal extracts for the identification of phytoconstituents	K4
CO5	Analyze various pharmacognostic parameters of crude drugs	K4
K1 – Remember; K2 – Understand; K3 – Apply; K4 – Analyze; K5 – Evaluate		

Unit	Content	Hrs
Unit I	Pharmacognosy– definition and scope – drug adulteration, drug evaluation, organoleptic, microscopic, chemical, physical and biological evaluation – phytochemical investigations – standardization and quality control of herbal drugs.	14
Unit II	Types of Plant drug and their Pharmacognostic study – root drugs: <i>Glycyrrhiza</i> and <i>Ipecac</i> , <i>Raulwolfia</i> , <i>Satavari</i> , <i>Withania</i> – rhizome drugs; Ginger – leaf drugs – <i>Andrographis</i> , <i>Clitoria</i> , <i>Senna</i> – bark drugs: <i>Terminalia arjuna</i> , <i>Holorrhena</i> – flower drugs: Saffron – Seed drugs: <i>Piperlongum</i> , <i>Mucuna</i> – Fruit drugs: Cumin, Amla, Senna pods – Whole plant drugs: <i>Catheranthus roseus</i> .	15
Unit III	Medicinal Principles and powder analysis of Curcuma, cloves, senna, Fennel and cinnamon – large scale Industrial preparation of Crude Drugs – limport and export potentials of Crude Drugs	14
Unit IV	Nutraceuticals and cosmeceuticals – Ayurvedic pharmacy- principles, formulations of drugs-Natural pesticides- Pyrethrum, Neem, Derris, Tobacco – Immuno- modulatory medicinal plants.	14
Unit V	Perfumes and flavorings agents- peppermint oil, Lemon oil, Orange oil, Lemon grass oil and Sandal wood. Pharmaceutical aids- honey. Starch, Kaolin, Pectin, Olive oil, Lanolin, Bees wax, Sodium alginate, Agar, and Gelatin.	15

Course Code: 21PBY413		Title: Core — 13 Research Methodology	Batch	2021—23
Hrs/Week: 6			Semester	IV
			Credits	4

Course Objectives

The main objectives of this course are to:

- Understand the concepts and types involved in research
- Provide the student with a conceptual overview of statistical methods with emphasis on applications commonly used analysis research experiment value.
- Gain the knowledge about the graphical representation of data, estimation, elementary probability and statistical inference will be covered.

Course Outcomes (CO)

On the successful completion of the course, student will be able to:		
CO1	Remember the basic knowledge on research	K1
CO2	Get the idea in the developing strong hypothesis and methodology for research	K2
CO3	Acquire knowledge on basic concepts in Biostatistics	K3
CO4	Evaluate scientific findings through various statistical tools	K4
CO5	Execute the basic research activities using biophysical instruments	K4
K1 – Remember; K2 – Understand; K3 – Apply; K4 – Analyze; K5 -Evaluate		

Unit	Content	Hrs
Unit I	Research Methodology: Research- introduction, objectives, types (fundamental, applied, qualitative and quantitative) and significance –selecting research problem –research design – needs and feature of a good design – Basic principles of experimental designs.	14
Unit II	Literature collection and citation: bibliography – bibliometrics (scientometrics): definition- laws – citations and bibliography - <i>*biblioscape-plagiarism</i> – project proposal writing – dissertation writing – <i>paper presentation (oral/poster)</i> – E- learning tools- monograph – introduction and writing- monograph for <i>Aloe vera</i> and <i>Ocimum sanctum</i> –Standard operating procedure (SOP) – introduction and preparation – Research Institutions – National and International.	14
Unit III	Bio statistics – definition – basic principles – variables – collection of data, sample, population and sampling techniques – primary and secondary data – tabulation and presentation of data – measures of central tendency – mean, mode, median and geometric mean – measures of dispersion – range, standard deviation and standard error –hypothesis testing – test of significance – test in large and small sample – t-test, f-test and chi square test – correlation and regression analysis.	16
Unit IV	Tools and applications of Excel and SPSS: measures of central tendency and dispersion – measures of significance – analysis of variance (ANOVA-single factor) – multivariate analysis – probability of distribution (binomial, poisson and normal) –cluster analysis.	14
Unit V	Basic principles and applications of pH meter, UV-visible spectrophotometer, centrifuge, lyophilizer, chromatography- TLC, Gas chromatography with mass spectrum (GC/MS), and HPLC-Scanning electron microscopy- Agarose gel Electrophoresis – Polyacrylamide Gel Electrophoresis –Polymerase chain reaction	14

Programme code	M.Sc.	Programme Title : Master of Science in Botany		
Course Code: 21PBY414		Title : Core – 14 Bioinformatics and Cyber security	Batch	2021– 23
Hrs/Week:	6		Semester	IV
			Credits	4

Course Objective

The main objectives of this course are to:

- Develop inter disciplinary skills in the application of computers in Botany to learn about the biological databases and machine learning techniques.
- Analyze the structure and functions of protein and nucleic acids using *in silico* tools and to apply the acquired programming knowledge in drug design for phytomedicines

Course Outcomes (CO)

On the successful completion of the course, student will be able to:		
CO1	Apprehend the ideas on molecular biology	K1
CO2	Apply various tools for genomic and proteomic studies	K2
CO3	Figure out the characteristics of biomolecules <i>insilico</i>	K3
CO4	Know the importance of Bioinformatics in Biology for the welfare of society	K4
CO5	Keep in mind the threats to cyber security and related social issues	K5
K1 – Remember; K2 – Understand; K3 – Apply; K4 – Analyze; K5 – Evaluate		

Unit	Content	Hrs
Unit I	Bioinformatics: Definition and Scope. Biological databases – Primary and secondary. Genomics: Definition – Gen Bank, DDBJ – Sequence and molecular file formats. Biological information portal: NCBI and EMB net. BLAST- An overview of BLAST tools available with NCBI – conserved domains – CpG islands.	14
Unit II	Gene prediction methods (Homology, <i>ab initio</i> , and comparative method). Pair wise and multiple sequence alignment, scoring matrices (PAM and BLOSUM). Molecular phylogeny (Cladistics and 62honic methods) CLUSTAL and PHYLIP.	14
Unit III	Proteomics: Definition, Levels of protein structure, Protein secondary structure prediction (SOPMA and JPRED). Molecular visualization tool – Rasmol and Swiss PDB Viewer. Protein modeling methods – Comparative and <i>De novo</i> methods. Model refinement and evaluation of model. Over view of SWISS PROT. Outline of computer aided drug designing. * <i>Systems biology – concept and applications.</i>	15
Unit IV	Cybersecurity: Overview of cyber security – confidentiality, integrity and availability – Threats – malicious software (viruses, Trojans, rootkits, worms, botnets) – memory exploits (buffer overflow, heap overflow. Integer overflow, format string) – cryptography – authentication – password system – windows security.	15
Unit V	Network security – network intrusion detection and prevention systems – firewalls – software security – vulnerability auditing, penetration testing, sandboxing, control flow integrity – web security – user authentication – legal and ethical issues – cyber crime, * <i>intellectual property rights, copyright, patent, trade secret, hacking and intrusion, privacy, identity threat.</i>	14

**Self study topics* (Study material for cyber security is available in college website in the form of e-book)

ADVANCED LEARNER COURSE

Programme code	M.Sc.	Programme Title : Master of Science in Botany		
Course Code:21PBYAL1	Title : Plant Ecology, tissue culture and Phytochemical techniques	Batch	2021 – 23	
		Semester	III	
		Grade		

Course Objective

The primary goal of this course is to carry out research on the field of ecology, plant tissue culture and phytochemistry

Course Outcomes (CO)

On the successful completion of the course, student will be able to:		
CO1	Students will keep in mind the ecosystem concepts and functions	K1
CO2	Gain the knowledge on basic tissue culture techniques	K2
CO3	Demonstrate the various aspects of extraction, isolation and Characterization of secondary metabolites	K3
CO4	Know the methods of screening of secondary metabolites for various biological properties	K4
CO5	Apply the skills to work with various Instruments	K3
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate		

Unit	Content
Unit I	Ecology: Principles of ecology - populations and their ecosystems, distribution, biotic communities and environmental relationships - density, frequency, abundance and relative indexes - quadrat method-Autecological studies - GCV and PCV of Plant communities - Soil analysis –Physical and chemical parameters
Unit II	Plant tissue culture: introduction to plant tissue culture - laboratory design and sterilization techniques - tissue culture media and preparation - concepts of tissue culture - initiation of plant tissue culture – micropropagation - callus culture – hardening methods
Unit III	Phytochemistry: Extraction of secondary metabolites (cold and hot) – Qualitative phytochemical analysis – alkaloids, flavonoids, glycosides, saponins, steroids, tannins, terpenoids, anthocyanins and phenols- Quantitative phytochemical analysis Alkaloids, flavonoids, glycosides, saponins, anthocyanins, and phenols.
Unit IV	Bioinstrumentation -AGE, Characterization of secondary metabolites and– TLC, Column chromatography, HPTLC, HPLC, LCMS/MS, GC/MS, UV, IR, ¹ H-NMR
Unit V	Biological studies of secondary metabolites: Estimation of antioxidant content (enzymatic and non-enzymatic) - antimicrobial activity (disc diffusion and agar well method) – cytotoxicity assay (MTT Assay)

VALUE ADDED COURSE

Programme Title : Value added course I			
Course code: 21PBVAC01		Title : Home Gardening	Credits 2
Hrs/Week:	2		

Course Objective

To equip the students with good farmers

Course Outcomes (CO)

CO1	To remember and get aware on home gardening and its importance	K1
CO2	To understand the technique used in home gardening	K2
CO3	To study the selected plants useful for the day to day healthy life	K3
CO4	To understand the values of medicinal and vegetable crops	K4
CO5	To know the present scenario on marketing of medicinal plants.	K4

Unit	Content	Hrs
Unit I	Home Gardening – Introduction – Classification – Principles –Designing –maintenance – plant propagation –types- methods- sexual propagation – seed – Asexual propagation –Division and separation – cuttings – Grafting –Budding – Layering – Tissue culture	8
Unit II	Nature of the plants- selection – seasonal and annuals – plantation – cultivation – methods – maintenance- preparation of beds and transplanting – manuring – interculture operations – Disease and pest and management	8
Unit III	Plants types – House plants – indoor plants – placements – pollution mitigating plants- culture of house plants –maintenance- herbal gardening – site preparation – soil –varieties – propagation and nursery management – sowing – maintenance- cultivation– Aloe , Tulsi, Aswagandha, Asparagus	8
Unit IV	Demo Practical's Preparation of land Preparation of Soil mixture Horticultural techniques, Various sowing practice Identification of medicinal plants	6

Power point Presentations, Group discussions, Seminar, Quiz, Assignment and Field visit

Course Objective

To equip the students with good farmers

Programme Title : Value added course II			
Course Code: 21PBYVAC02		Title : Bonsai Technique	Credits 2
Hrs/Week:	2		

Course Outcomes (CO)

CO1	To recollect the background of bonsai making	K1
CO2	To understand the importance bonsai art	K2
CO3	To remember and get aware on home gardening and its importance	K3
CO4	To study plants selected for making bonsai both aesthetically and profitably	K4
CO5	To understand the values bonsai and the worldwide scenario of bonsai	K4

Unit	Content	Hrs
Unit I	Bonsai – History – importance- methods of bonsai making – rules of making bonsai – cultivation – shaping and styling –care and maintenance- bonsai society national – Indian bonsai association and international – American bonsai society	8
Unit II	Factors affecting bonsai - physical – sunlight – watering – fertilizer application – maintenance – insects and disease management – application of pesticides, fungicides	8
Unit III	Mosses – basics –Bonsai soil – Trees - Growth principles –plants used for bonsai making – selection of plant parts – roots – trunks –branches and foliages – commercial importance and market values of bonsai	8
Unit IV	Demo Practical's Pot selection, Tools required Wiring, Basic proportions of soil Basic designs	6

CERTIFICATE COURSE	
FIRST YEAR	Plant Tissue culture
SECOND YEAR	Mushroom Cultivation

CERTIFICATE COURSE			
Course Code: 21PBYCFC01	Title : Introduction To Plant Tissue Culture	Batch	2021 – 23
Hrs/Week: 4		Semester	III
		Credits	2

Course Objective

The main objectives of this course are to understand the:

- Principles and culture techniques of cells, callus, organs, pollen, anthers, embryos, and protoplasts.
- Applications in clonal propagation and research in breeding, physiology, and pathology.

Course Outcomes (CO)

On the successful completion of the course, student will be able to:		
CO1	Recall or remember the principles and culture techniques of cells, callus, organs, pollen, anthers, embryos, and protoplasts.	K1
CO2	Understand the techniques used in plant growth and regeneration under <i>in vitro</i> conditions.	K2
CO3	Apply clonal propagation and research techniques in plant breeding, physiology, and pathology.	K3
CO4	Analyze the conditions that are suitable for direct and indirect plant regeneration.	K4
CO5	Compare the performance of <i>in vitro</i> raised plantlets with those of <i>in vivo</i> raised plants.	K5
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate		

Unit	Content	Hrs
Unit I	TISSUE CULTURE MEDIUM PREPARATION Introduction to plant tissue culture, lab facilities and operations, tissue culture media: preparation and handling, establishing aseptic cultures	10
Unit II	PLANT REGENERATION Role of plant growth regulators, micropropagation via axillary and adventitious shoot proliferation; organogenesis, Somatic embryogenesis.	10
Unit III	TECHNIQUES IN PLANT TISSUE CULTURE Double haploid production by androgenesis and gynogenesis; triploid production by endosperm culture production of virus free plants by meristem, shoot-tip culture; Cell suspension cultures; protoplast isolation and regeneration.	12
Unit IV	FUNDAMENTALS OF PLANT TISSUE CULTURE Totipotency of plant cells, Introduction to plant tissue culture, explant selection and medium composition and plant growth regulators, In vitro culture: physical, genetic, chemical and genotypic factors. Assessment of growth	12

	and development in vitro. Problems in plant tissue culture (Recalcitrance, Contamination, Phenolic Browning, and Seasonal Variation).	
Unit V	Somatic hybridization and cybridization; Protoclonal, Somaclonal variation for crop improvement; Synthetic seed technology and <i>Cryopreservation</i> . Hardening and acclimatization of tissue culture plants in Green house.	12

CERTIFICATE COURSE				
Course Code: 21PBYCFC02		Title : Mushroom Cultivation	Batch	2021 – 23
Hrs/Week: 4			Semester	III
			Credits	4

Course Objective

The main objectives of this course are to enable the students to:

- Understand the structure and occurrence of mushrooms
- Teach how to identify mushrooms
- Study the cultivation technique of various edible mushrooms
- Know the uses of mushroom and their economic importance
- Establish mushroom cultivation as business enterprise

Course Outcomes (CO)

On the successful completion of the course, student will be able to:		
CO1	Obtain an in-depth knowledge on structure and various types of edible and non-edible mushrooms	K1,K2
CO2	Understand the difference between edible and poisonous mushrooms	K3
CO3	Knowledge on identification and cultivation of different varieties of edible mushroom	K3, K4
CO4	Understand the utility of different edible and non-edible mushrooms.	K5
CO5	Knowledge on the production and marketing strategies for mushrooms	K6
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate		

Unit	Content	Hrs
Unit I	Mushroom Taxonomy Introduction - history and scope of mushroom cultivation. General characters of mushrooms: Thallus structure - mode of nutrition – reproduction -distribution. Morphology of mushrooms: Stipe – pileus – gills – annulus and their variations. Structure and keys for identification of poisonous mushrooms – <i>Amanita muscaria</i> , <i>Psilocybe mexicana</i> - <i>Lycoperdon gigantium</i> . Medicinal Mushroom – <i>Cordyceps</i> , <i>Ganoderma lucidum</i> and <i>Lentinus edodes</i> .	10
Unit II	Mushroom centre Infrastructure of mushroom centre: Layout of traditional and greenhouse method - Methods of mushroom cultivation - maintenance of sanitation in mushroom plants. Site size and area - spawning room and cropping room and their importance - composting unit. Formulation of compost- IARI, IIHR and ICAR formulae.	10
Unit III	Cultivation of edible Mushrooms Cultivation of button – oyster and Paddy straw mushrooms: Substrates: types, processing, sterilization, preparation for cultivation. Preparation of compost- formulations - supplements – methods of compost preparation (long method and short method) - pasteurization of compost. Filling of compost in trays. Spawning methods: Casing - crop management after spawning - maintenance of temperature and relative humidity – harvesting and packing.	12

Unit IV	Mushroom harvesting Post-harvest management – Harvest - preservation of mushrooms, storage methods, quality assurance of mushrooms. Bacterial diseases of mushrooms, pests and nematodes infestation on edible mushrooms and mushroom beds. Principles and methods of pest management - chemical control. Integrated pest management. Influence of abiotic factors affecting mushroom production.	12
Unit V	Value added products and marketing Production of various mushroom based foods for marketing - pickles, jams, chips, soup, cutlet, vegetable curry, samosa and omelet. <i>Mushroom recipes - mushroom curry - mushroom pulao - mushroom pickles - mushroom fry - mushroom kuruma - mushroom briyani.</i> Developing small scale industry, special training for developing small scale industry -Government schemes - large scale industry requirement - cost benefit ratio - marketing in India and abroad, export value.	12
